## ABOUT CBD

Cannabidiol (CBD) is a naturally occurring compound found in Hemp plants. Although some of these cannabinoids are known to be intoxicating (THc), CBD is completely non psychoactive, meaning it does not produce any such effect.

Our CBD comes from Spirit of Hemp who harvest their organic hemp by hand in Switzerland & Austria. After the CO2 extraction of the oils, they reintroduce steam-distilled terpenes (the life force) back into the oil, therefore creating a far superior CBDA oil for consumption.

There are more than 20,000 terpenes in the world, over 100 over these are found in the hemp plant. These are the driving force behind the medicinal uses for CBD oil, increasing the efficacy for stress relief & mood enhancing.
