## PROJECT BRIEF

Corporate Office went through a metamorphosis to upgrade its waiting and rest areas. An essential part of the refurbishment was the choice of flooring. There was a need for a high designs using different colours and shapes, but it also had to adhere to safety and hygiene regulations for dining and catering areas.

Loom+Knit was chosen for its slip resistance, versatility and ease of installation and the ability to create a high spec design without compromising on safety.

The choice of flooring was used to create special effects, playfully and daringly interspersed with 5 different colours and two different modular sizes that was repeated synchronously throughout the room to harmonise the modern furnishing.

Our Woven Vinyl is of its kind with Extra Ceramic PU coating treatment, using innovative technology NFD woven planks are hot sealed together for an even surface to prevent penetration of dirt and liquid in between the fibres to prove liquid absorption, ensuring long-term easy maintenance and protection. Knit flooring is designed with interlaced core yarn fibres and a unique clean cut finish to prevent fraying at the edges.

Loom+ Woven planks produce a diverse range of vinyl flooring in a large selection of colours and finishes, our Woven modular comes in different tile sizes with the same thickness allowing for the endless mix and max patterns to create that unique space.
