

Electric material lifter

Portable lifter perfect for lifting and transporting heavy loads

BD 400 is a portable electric lifter with electronic height adjustment for safe lifting of heavy loads.

It's rear facing counterbalance system allows for easy lifting of loads adjacent to walls.

This is the ideal lifting device for construction and industrial applications that need to work in tight areas.

It is easily folded up for transportation and can be ready to use in seconds.

- Mast is strong and lightweight with aluminium anti-torsion rails
- Immediate use on site, activated in seconds without tools
- Can be used on sloping ground by orienting the adjustable wheel supports in front of the mast
- Electric motor 230 V - 50 / 60 Hz (110 V also available)
- The **variable speed** controller is easy to use for soft start or to adjust the micro operating height.
- Emergency Stop Button, to stop raising / lowering immediately.
- Manual operation in case of power failure
- **Automatic clutch breaker**: prevents over weight loading
- Adjustable wheel base

Max. load capacity	Weight
3m, 250 kg; 4m 200kg	100 kg
