

CHILL

The Chill modular collection allows you to freely create a leisure space thanks to independent modules that can create various configurations.

CHILL

Shapes and sizes (in cm)

Furniture	Width	Depth	Height
Single module	98	108	69
Single module with side (left/right)	130	108	69
2-seat sofa with backrest (left/right)	130	108	69

Technical data:

- Is recommended to order all furniture sets at the same time due to the possibility of color differences in fabric;
- The modules are available in a standard version or with a removable cover - the cover can be removed eg. for cleaning or replacement, and is attached to the bottom of the furniture with Velcro. Each module (except the pouffe) comes complete with a long or short lumbar pillow (corner module, 2-piece sofa with partial backrest) and a square one;
- The pillows have removable covers;
- The modules, despite their large dimensions, are quite light and mobile, which allows for easy arrangement changes in the home space;
- Legs – black plastic;
- Rack frame - pine wood, beech wood, furniture board, plywood;
- Seat – wavy spring, HR30 foam, padded upholstery;
- Backrest - HR30 foam, padded upholstery, silicone filling;
- Describe modular sets from left to right while standing and looking at the furniture from the front. The modules are completely upholstered/finished - they can stand in the middle of any interior in a configuration or individually;
- Each module is equipped with retractable hooks under the seat (crocodile clips) used to create individual configurations;
- The overview drawing showing the ordered modular configuration should be an inseparable element of order;
- Corner modules allow you to attach further modules to both sides of the seat, which allows you to build corners in any configuration.
