

Additional Information

Residential Tankless Water Heaters

Features and Benefits

- Long Life Expectancy (20+ Yrs)
- Endless Supply of Hot Water
- 24 Hour Technical Support (365 Days a Year)
- Digital Keypad Included for consistent temperature control
- Saves up to 16 Square Feet of Living Space (great for new construction)
- Compact design can be installed in attics, crawl spaces and outdoors
- Significant Energy and Cost Savings, uses gas only when hot water tap is on
- Low Noise Level
- Direct Electronic Ignition
- ENERGY STAR® qualified
- Mobile Home and Modular Home models available
- Leading Industry Warranty - see website for details
- All Parts are Replaceable

Rinnai Tankless Venting

- Rinnai units can be vented through the roof or out through a side wall
- Inside air is not required for combustion
- Rinnai tankless units require Rinnai concentric venting
- Rinnai introduced the combination of tankless technology and concentric venting to North America to deliver a high level of comfort, efficiency, and safety

Concentric Venting provides:

- A high level of safety with its positive fit and lock joints
- Seals expand and contract with weather and temperature changes
- Features two layers of protection from exhaust gases
- Requires zero clearance from combustibles
