

5 EASY STEPS

STRETCH BRACELET

Thread the beads and the charms onto the cord following the suggestion in the tutorial photo.

1

Attach the elastic cord to the work surface with a piece of adhesive tape. You can use a bead stopper or a clip (optional).

2

3

Tie off the bracelet with a tight surgeon knot.

4

Cut the excess cord, leaving about $\frac{1}{4}$ " (6mm). Secure the knot by covering it with a drop of craft glue or clear nail polish.

5

Slide the adjacent beads over the knot before the glue completely dries off. Wait for the glue to dry completely.
