## STEP 1 (Two adults are required to complete this step)

Attach the stationary sides (SS) to the end panels (EP) using eight bigger Allen bolts (3), eight bigger washers (8) and the Allen key. Take care to insert the washer between the bolt and the stationary side vertical post!

REQUIRED

WARNING: TO KEEP YOUR BABY SECURE AND SAFE, AND TO AVOID POTENTIAL INJURY OR DEATH, IT'S VERY IMPORTANT TO COMPLETELY TIGHTEN ALL 26 bOLTS LISTED IN STEP 2.

## STEP 2 (Two adults are required to complete this step)

Turn the crib upside down, taking care not to scratch its finish.
Attach the base frame (BF) to the stationary sides (SS) and to the end panels (EP) using six bigger Allen bolts (3), six bigger washers (8) and the Allen key. Take care to insert the washer between the bolt and the base frame wooden components!

Attach the decorative legs (DL) to the crib using 12 smaller Allen bolts (4), 12 washers (8) and the Allen key. Take care to insert the washer between the bolt and the metallic plate!

Completely tighten all 14 bigger Allen bolts (3+8) and all 12 smaller Allen bolts (4+8) used before.

Turn the crib in its normal position, taking care not to scratch its finish.

## REMINDER

You have to completely tighten 14 bigger Allen bolts and 12 smaller Allen bolts, distributed as following:
-8 bigger bolts (3+8) in the stationary sides;
-6 bigger bolts ( $3+8$ ) in the base frame;

- 12 smaller bolts (4+8) in the decorative legs.

## STEP 3 (One adult is required to complete this step)

Assemble the mattress support using 4 bigger round head bolts (5), 4 "butterfly" type nuts (7), 4 smaller lock washers (9) and a Phillips screwdriver (not supplied).

The lock washer must be attached to the bolt after the bolt passed through the frame and the metallic bracket of the mattress support and before attaching the nut.

There are three positions for the mattress support (from the highest one for a newborn to the lowest one for a child that is maximum 35 " tall - see caution note). You must adjust the height of the mattress support depending of your child height by inserting all four bolts in the same position (see FIGURE 3).

Do not completely tighten the bolts at this step, you will be asked to do this later.

## ADJUSTING THE HEIGHT OF YOUR MATTRESS SUPPORT

To adjust the vertical position of your mattress support you must remove the mattress support from the crib (please see STEP 4), remove all four bolts \& nuts ( $\mathbf{5 + 9 + 7}$ ), lower the frame and insert the bolts (5) back into the corresponding holes, according to the desired height (see FIGURE 3). Then, you must attach the lock washers (9) and the nuts (7) as described in STEP 3, attach the mattress support to the crib (please see STEP 4) and completely tighten all the bolts.

Your crib is designed in such a manner that, when the mattress support is adjusted to it's lowest position, the mattress support frame must be placed directly over the bottom frame. Before tightening the bolts, you must slightly press the mattress support frame to make sure this position is achieved.
WARNING: TO KEEP YOUR BABY SECURE AND SAFE, AND TO AVOID POTENTIAL INJURY OR DEATH, IT'S VERY IMPORTANT TO COMPLETELY TIGHTEN ALL 8 BOLTS (5+9+7) \& (6+9) AFTER YOU HAVE ADJUSTED THE HEIGHT OF YOUR MATTRESS SUPPORT.
