# Locate What Matters Most

# Overview

## What is the Elios GPS trackable power bank?

The Elios GPS trackable power bank combines portable power with smart innovation. Use these devices to stay safe, power your gear and keep track of your stuff anywhere in the world.

## Protect yourself and safeguard your:

- Luggage
- Bags
- Vehicles
- Children
- Pets
- Gear

## How it works

The Elios Smart GPS tracking power bank will fully charge a smartphone nearly three times and can track personal gear in more than 210 countries. The SOS panic button keeps you safe by sending instant alert notifications to selected groups of contacts or law enforcement.

- 1 Pair your Elios device
- 2 Place your device
- 3 Track your device in the Elios app

# Features

## Real-Time Tracking

Track the location of objects from the app or online in real time. You can view the exact address, travel history, speed of travel, and more.

## Movement Alarm

With Elios inside, you can set up alert notifications on your smartphone if your bag, car, backpack, package, or other asset moves.

## Geo-Fence

Set a geo-fence around your home, school or other location and receive notifications if your tracker enters or leaves the marked boundary.

## SOS Panic

Press the SOS button from anywhere to send a pre-programmed message and GPS location to a list of contacts or local law enforcement.

## Track Share

Send an email with a link to a secured interactive map of your whereabouts. The device creates a GPS trail showing your path, speed of travel, and more.

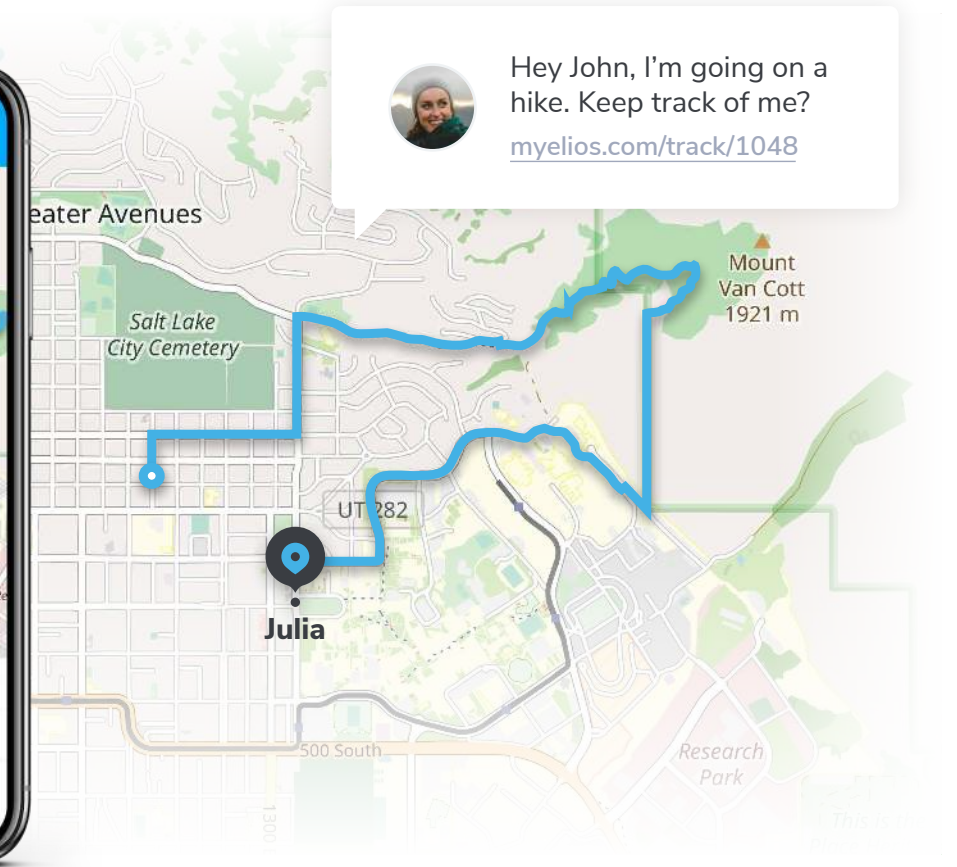

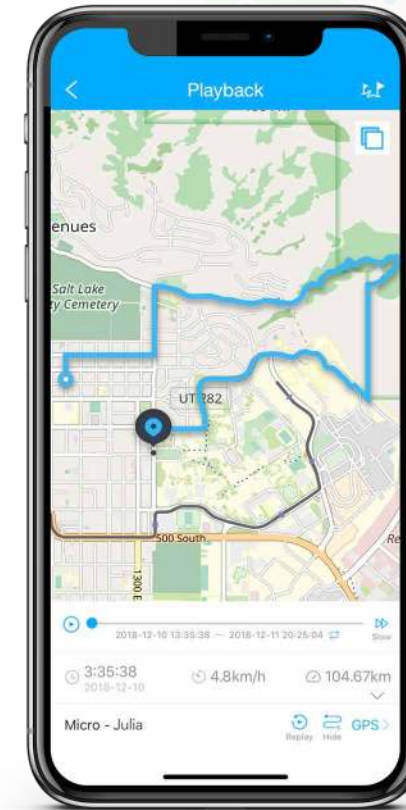

# Only from Elios

## How Track Share protects you

The broadcasting feature sends an email with a link to a secured interactive map of your whereabouts to friends and family. This feature is perfect if you're meeting someone for the first time, on your way home from work, hiking the backcountry, or on a road trip.

As you walk, run, drive, or hike, a GPS trail is created of your exact location showing your path, speed of travel, and other vital information.

# Only from Elios

## Real-Time Tracking

Track the location of objects such as: kids, bikes, vehicles, pets, drones, luggage, camera gear, and much more from the app or online in real time. You can view the exact address, travel history, speed of travel, and more.

## Only from Elios

### **Movement Alarm**

With Elios inside, you can set up alert notifications on your smartphone if your bag, car, backpack, package, or other asset moves.

With the Elios inside your bag, purse, car, backpack, package, or other assets, receive instant alert notifications to your cell phone if the device moves.

# Only from Elios

## Geo-Fence

Set a geo-fence around your home, school or other location and receive notifications if your tracker enters or leaves the marked boundary.

Geo-Fence allows users to set invisible “fences” around a geographic location. A user can set a geo-fence around their home and receive an alert notification if their pet, child, car, package, or other item enters or leaves the marked boundaries.

Sparky has left the Geo-Fence.

## Only from Elios

### SOS Panic

Press the SOS button from anywhere to send a pre-programmed message and GPS location to a list of contacts or local law enforcement.

Whether you are concerned about your personal safety, or need a backup solution to stay connected where cell service is not covered, pressing the SOS button will send a pre-programmed message and GPS location to a list of your contacts.

# Uses

Track your bags

Track your luggage

Charge your devices

Keep your devices charged & easily locate what matters most

## Product Specs — GPS Tracking

Elios offers the only devices that combine power banks and narrowband global tracking, and we offer the longest battery life and most accurate positioning available today.

Accurate positioning within 5 meters outdoors

Signal transmission in areas with no cell coverage

Indoor positioning systems in multi-layered buildings and up to 10 stories underground

Narrowband (IoT) Tracking with 7 times greater coverage than LTE

Integrated technology that dwarfs all other GPS trackers

Bluetooth	LTE-M1	GSM Fallback
Additional satellite systems	BLE	WPS
GPS	GALILEO	GLONASS

# About Elios

## About

Elios, Inc. is located in the heart of the Silicon Slopes with years of experience developing bleeding edge power and tracking technology for people on-the-go. Industries benefiting from our products include: law enforcement, travel, outdoor, filmmaking, academia, global exploration, and many more.

## Causes

We support causes and organizations focused on the prevention of future crimes against children, and that address victims, survivors and families with the resources and community they need to encourage hope and empower their future.

## Technology partner

The background of the entire image is a dark gray, almost black, surface. Overlaid on this is a complex, white wireframe pattern that resembles a 3D mesh or a topographical map. The lines of the mesh are thin and white, creating a series of peaks and valleys that flow across the frame from the top left towards the bottom right. The overall effect is one of depth and movement, despite the static nature of the image.
