SURPRISING COLOR PLAY ON A VARIETY OF SURFACES!

Hydro-dipping made easy with Easy Marble paint and water!
Create colorful and elegant marble effects in a matter of seconds.

MARABU EASY MARBLE®

Solvent-based paints used with water for hydro-dripping and to create quick and elegant marbled patterns on a variety of flat surfaces or dimensional objects. Use them on their own or blend the paint together for infinitely creative possibilities. Add the paint to the surface of water – just drip, swirl and dip! Use on glass, plastic, metal, wood, papier-maché, polyester, polypropylene, smooth foam, canvas, paper and more. Add mesmerizing shimmer effects with Color-shifting Glitters and Metallics that change their hue when viewed from different angles. Use Crystal Clear as a medium for doing single-color marbling or to make custom colors by mixing in mica powders or fine glitter. Shake/stir well before use. 15 ml bottles with dropper top.

*Indicates color that is more opaque

Number of Colors Available	41 Colors + Clear
Most Permanent Workable Surfaces	Glass, plastic, metal, wood, papier-maché, polyester, polypropylene, smooth foam, canvas, paper and more
FAQs	Use with room temperature tap or distilled water, no chemicals required • Pre-clean glass, metal, or other slick surfaces with isopropyl alcohol • Have your colors well shaken/stirred and opened, and work quickly • The paints' open time is about a minute depending on the air temperature and how much paint is on the water. More paint and a cooler temperature will give a longer open time • Add enough paint to cover the entire surface of the water and stir gently to create desired marbled pattern • Can be used on fabric for decorative purposes only • Test synthetic objects first • Touch dry after 15 minutes, fully cured after 24 hours • Clean spills with isopropyl alcohol when wet. Use xylene or similar solvent to clean up when dry • Not food safe or washable • Add a coating of a water-based varnish to act as an isolation coat when using resin-based epoxy. Test first • Recommended for ages 9 and up

Easy Marble Starter Set

3 easy steps to beautiful marbled effects

1 DRIP
Sprinkle first color generously across the water's surface, then drip more colors on top. Swirl gently with toothpick or skewer to create marbled pattern.

2 DIP
Slowly submerge item through the pattern into water. Wipe or blow away excess paint floating on top before pulling item out.

3 DONE
Allow item to dry for 15 minutes. Clear the water's surface with paper towel and do it again!

AQUA GLOSS VARNISH

Protect what matters! Use this brushable, water-based, acrylic polymer varnish in both craft and art applications as a protective layer over your work on a variety of surfaces. Recommended for use over fully-cured, acrylic-based and other permanent paint, it can also be used as an isolation coat between solvent-based paints such as Marabu Easy Marble and epoxy resin coatings. Dries to a crystal-clear, high-gloss finish. Has excellent flow and is weather-resistant and non-fading. Cleans up with water. Stir before use. 50 ml jar.
