

Intermediate / Senior Full Stack Developer

Christchurch

Helping our customers charge electric vehicles faster, safer and cheaper.

We build charging solutions for electric vehicles. We're passionate about designing the best charging experience and building rugged, sustainable products. We want you to join us.

At Evnex, we build hardware and software services for electric vehicles charging. Our customers are EV owners and commercial fleet operators. We also work with some of New Zealand's largest electricity distributors and retailers and are expanding our operations further abroad.

We're backed by some of New Zealand's top investment groups and are growing our team to meet increasing demand internationally.

We're a friendly team who look forward to coming to work, we enjoy learning and sharing our knowledge. We're highly cross functional and work across business development & strategy, mechanical design, electronics, firmware, mobile and web design.

The Role

You'll be joining our cloud team who are responsible for building our charge point management SaaS and mobile apps. As a member of a small team, you'll contribute strongly towards architecture, technology, and security. Working alongside our other engineers, designers and sales people, you'll experience first-hand how your work adds value to the rest of the business and our customers.

Your responsibilities will include:

- Working with the cloud team to make key decisions around technology selection and architectural decisions, while considering commercial constraints
- Translating market needs and customer feedback into software requirements
- Building and maintaining the code base of the Evnex platform
- Supporting with dev-ops within the AWS ecosystem

Our stack includes React, Redux, Node.js, Redis, React-Native and Docker. Along with AWS services such as DynamoDB, Lambda and EC2.

Who are we looking for?

- You're willing to go the extra mile – you're looking for a team of people who love what they do, and a company who'll give you support and incentives to excel
- The right fit - you're looking for a role where you can look forward to coming to work, and contribute to a culture that makes that possible
- A team player – you're humble and willing to change your view, but bold enough to make your voice heard when somethings not working out

What you'll need to have

- At least 3 years of experience with web technologies and cloud software
- A keen desire to share your knowledge and mentor others
- Excellent communication skills – both written and verbal
- A strong passion for what you do, and a desire to improve
- An up to date knowledge of the latest technologies and frameworks, and the commercial acumen to know when they should be applied

Nice to have

- A knowledge of dev-ops and networking fundamentals
- Experience working with hardware and IoT devices

Why work at Evnex?

- Employee stock ownership plan – own part of a company that's building the future
- Working in a small team means you'll be exposed to a wide range of challenges, and opportunities to grow
- We encourage our team to attend conferences and training that will support their development
- Be part of a team that serious about sustainability and social responsibility, we're always looking for ideas to improve!
