

CoJack-Plus

Multi-Purpose Table

Lift, Tilt, Transport

The Cojack-Plus Multi-Purpose Table meets all your patient lifting, exam, transport and surgical procedure needs. With the flip of the lift/Tilt rocker switch, the user can determine the functionality of the footswitch, left to enable table height adjustments and right to enable table tilt adjustments. The footswitch operates a dual rechargeable 24 Volt actuator system that lifts up to 250lbs. The stainless steel table top is 60" long by 22" wide with raised edges to prevent fluid run-off, a drain opening with hook for collection pale, two sliding tie-down restraint cleats on each side for secure animal transport, and four rotating non-marring bumpers. Top will rise to 40" and lower to 14" with a 60" tilt capability meaning less back strain or injury when working with larger breeds. Four corrosion resistant reinforced nylon swivel and total locking casters provide easy maneuverability.

The Cojack-Plus Multi-Purpose Table offers more than just years of service. It offers the budget conscious the opportunity to own a sturdy table that can lift, tilt, and transport without the clutter of numerous tables that serve just one function.

FEATURES

- › 60"L x 22"W stainless steel table top with raised edge to channel fluids to drain opening.
- › Top raises from 14" to 40" with a 60 degree tilt capability.
- › Four sliding tie-down restraints
