## Dimensions.

\*JACOPO IS HANDMADE AND SOME VARIATION IS EXPECTED

### Fixing Instructions.

1. Fitting requires installation by a qualified electrician.
2. Ensure the electrical supply is OFF. Disconnect the electrical supply at the mains board.
3. Position the light as required and mark the wall surface using the TWO mounting holes in the rattan shade plate as a template.
4. Find the midpoint between the two marks, and position the base of the ceramic lamp holder 130MM below the mounting hole marks.
5. This is the suggested location of the lamp holder.
6. Mount lampholder.
7. Using WAGO connectors or similar (not provided) make the electrical connections within the wall cavity.
8. Install the supplied LED max 4W lamp.
9. Using the supplied brass mounting pins hang the shade over the lamp holder.
10. Switch on at the mains board. The fitting is now ready for use.
