Up Down Wall Light.

Fixing Instructions.

1. Fitting requires installation by a qualified electrician.
2. Ensure the electrical supply is OFF. Disconnect the electrical supply at the mains board.
3. Position the light as required and mark the wall surface using the TWO mounting holes in the wall plate as a template.
4. Drill pilot holes, Insert rawl plugs (not provided) for masonry mounting. Mounting directly into timber does not require plugs but pilot holes are recommended.
5. Using WAGO connectors or similar (not provided) make the electrical connections within the wall cavity.
6. Use the Phillips screwdriver to mount the fitting with the supplied dome head screws.
7. Support the fitting during installation until all screws are secured and set in place.
8. Install the supplied lamps.
9. Switch on at the mains board. The fitting is now ready for use.

Care Instructions.

1. Brass is a noble material and will naturally patina. This is intentional.
2. Clean the light with a dry, soft cloth. Do not use polishes or abrasives.
