Intended use

These products are intended for protection against a variety of hazards including liquid droplets (3), large dust particles (4), low energy impact (F) and medium energy impact (B) at extremes of temperature -5°C and +55°C (T) in accordance with EN 166:2001. These products also help protect against UV radiation in accordance with EN 170:2002.

The GoggleGear lenses are also intended to give an enhanced level of protection against fogging and scratching from the Scotchgard™ coating which meets K rating for anti-scratch (AS) and N rating for anti-fog (AF) as per EN 166:2001.

Sterilisation by autoclaving – internal testing has been carried out on GG6001NSGAF-EU samples subjected to 40x automatic cleaning and disinfection and sterilisation by autoclaving at 121°C. Testing was then carried out on the following properties:

- ▶ mechanical performance (BT)
- ▶ the anti-fog properties (K)
- ▶ the anti-scratch properties (N)
- ▶ splash protection (3)
- ▶ optical performance (Class 1)

Based on the internal testing the claims remain valid.
