

## New addition to Telephone Hood range

### T900 - Acoustic Fabric

#### Description

The T900 has been designed to provide visitors or staff with an increased level of privacy when making phone calls.

This modern, bright, wall mounted enclosure will provide a dedicated space to turn away from surrounding ambient noise. It can also be used on a desk, easily moved when needed. Originally intended for mobile phone use, provision has also been made for a wall mounted phone to be fitted to the inner back wall, if required

Professionally upholstered in Camira Blazer © acoustic lambswool fabric, with a billiard cloth felted finish, the sturdy assembly is supplied as wall mountable out of the box (just 3 screws required in your wall). SpringLOCK® mounting brackets (included) then lock the hood securely in position, only removable using the special tool provided

New addition to Telephone Hood range
