

SEAL 1 CLP PLUS® APPLICATION INSTRUCTIONS & BENEFITS

Clean, Lube and Protect Your Firearm

Safety, Accuracy, Performance & Maintenance in one easy step!

SEAL 1 CLP Plus® is a bio-based, non-toxic product. It comes in a paste, a liquid, an aerosol, and pre-saturated bore specific patches (SEAL SKINZ™). They all do the same thing, just different methods of application.

Application:

- Start with a clean firearm.
- Apply SEAL 1 CLP Plus® to the entire firearm, inside and out.
- For the first use, let it stay on for about 15-20 minutes (optional), then wipe the firearm completely dry.
- It may take about three cleanings (clean/shoot cycles) for SEAL 1 CLP Plus® to remove residues from previous products and "season" the firearm.

Compatibility:

- SEAL 1 CLP Plus® is safe on all surfaces; metal, plastic, composite, polymer, rubber, leather, and wood.

Performance:

- SEAL 1 CLP Plus® is a dry lubricant! Malfunctions are virtually eliminated when used properly.
- A one-and-done formulation, SEAL 1 CLP Plus® eliminates the need for any other products used for cleaning, lubrication, or protection of firearms.
- A potent antioxidant, long-lasting protection prevents corrosion and rust.

Benefits:

- Users will notice a difference after the first cleaning.
- Subsequent cleanings become easier, suggesting an improvement in the firearm's condition with each use.

SEAL 1 CLP Plus® is a one and done formulation; Wipe On – Wipe Off! It doesn't get any easier or more effective.
