

# GRAFTING TOOLS

## PRECISION GRAFTING AT ITS BEST

The Pro-Grafter handheld grafting tool, the Pro-Grafter foot-operated grafting tool and the Air-Grafter pneumatic grafting machine have been manufactured in South Africa and can be utilised in nurseries, vineyards and orchards (including on macadamia wood). These easy-to-use, precision grafting tools allow users to increase their graft-take rate, improve fieldwork efficiency and reduce labour costs. The Air-Grafter is predominantly used by operators who perform numerous grafts per season.

### FEATURES

- Cut = "V" shape
- Manually cuts soft and hard wood
- The highly tempered steel blades cut wood from 3mm to 25mm (0.12" to 1") without the need to make any adjustments
