# EdenPURE® GEN30 Classic
EASY START-UP GUIDE

1. Plug the power cord supply into a grounded wall outlet (120V, 60Hz)

2. Press the **power button** to turn the heater on (The heater must be turned on first in order to use your remote control.)

3. Mode Key Functions:

    a. Press the mode button one time to set to Eco. You can adjust your temperature with the **arrow keys** next to the **mode button**. The temperature will then display.

    b. Press the **mode key** two times to set to High. You can adjust your temperature with the **arrow keys** next to the **mode button**. The temperature will then display.

    c. Press the **mode key** three times to set to Low. You can adjust your temperature with the **arrow keys** next to the **mode button**. The temperature will then display.

    d. Press the **mode key** four times to turn the heater off.

4. Turning the Heater to Standby Off

    a. To turn the heater to Standby Off, Press the **Standby button.** The heater will shut off but the fan will continue to run until all the heat has been expelled.

    b. If you are not going to use the heater for a long time press the **power button** to fully shut down the heater.

5. To set the thermostat, press the **mode button**, and set to Auto mode. Press the **arrow up** or **arrow down** buttons to set the desired temperature.

6. Setting the timer:

    a. You must use the remote control to set the timer.

    b. Turn heater on by pressing the **power button** on the heater.

    c. Press the **timer button** on the remote control until set time starts flashing. The default is 3 hours.

    d. Press the "+" button to increase the time or the "-" button to decrease the time.

    e. Timer can be set up to 12 hours.

    f. The timer will set after the LED display stops flashing.

    g. The heater will shut off automatically when the set time is reached.
