### INSTALLATION

#### 1 Installing the Brackets

##### OUTSIDE MOUNT:

Position brackets **A** above window opening. Remember to leave the brackets few inches away from each side of your window. Spread them out evenly by having same distance from each side of the window.

##### NOTE:

Make sure the shade is level!

##### INSIDE MOUNT:

Position brackets **A** along the top of the window opening in the desired location. Remember to leave few inches away from each side of your window.

#### 2 Prepping the Shade

Remove the wrap and install the headrail endcaps **C**, and bottomrail endcaps **D** on each end.

### 3 Mount Shade on Brackets

Install the headrail by hooking the front of the **bracket A** and push shade towards back of **brackets**, in a rolling motion, until clicks place.

### 4 Installing the Handles

Attach the handle to the bottom rail.

### Quick Reminders

 Please allow 24 hours for your shade to drop to its actual height when first installed due to the nature of the fabric.

 For cordless cellular shade, it is recommended to operate every 5 to 7 days because if the fabric is in long-term stationary position, that will cause the operation to not function smoothly (raising and lowering), especially for opaque fabrics.
