

PRINTABLE RING SIZE GUIDES

Find your ring size with these two easy-to-use tutorials. All you need for these two hacks are a printer, a credit card and a ring of your own. Just a little tip, make sure to use a ring in a similar style with a similar band width to the ring on your wish list.

First, print this document out ensuring the page scaling is set to 100% for a full A4 page. When printed, grab a credit card and place it over the below shape. It should fit exactly into the shape.

A large, empty rounded rectangle with a thin black border, intended for a credit card.

METHOD 1 – USE A RING YOU OWN

STEP 01

Measure the internal diameter (illustrated below) of a ring you own that mirrors the fit you want for your new piece. Then match it with the right ring size in step 03.

STEP 02

Place the band of your ring on the chart below and match the inside edge to the nearest size circle. The circled letter that best fits your ring is your ring size. Falling somewhere in between two sizes? We suggest you opt for the larger for maximum comfort.

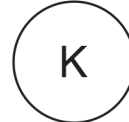

14.80mm

METHOD 2 – PRINT YOUR OWN RING SIZE

STEP 01

Measure the lines marked A and B. This will confirm you've printed the document to be the right size.

STEP 02

Cut around the ring sizer's serrated lines and the slit at the top. A little tip for cutting your slit: fold your ring sizer in half (lengthways) then cut along the serrated edge. When you unfold your sizer you'll have a perfect line.

STEP 03

You're almost there. Now just push the opposite end of your sizer through the slit and then place on the finger you'd like your new ring to be placed on. Adjust to fit and make sure it can slide on and off comfortably.

STEP 04

Check the line and make a note of your letter, then match up with our table. This is your ring size.
