

# Yarn Snips- now with Tip Protector

[These photos are to show what this item looks like – not the final professional photos!]

Our same rustic, one-piece Yarn Snip made of forged black steel, now comes with a natural vegetable-tanned leather point protector to keep both you and the snip protected while not in use.

## Details:

- 4" inches long
- Cover is made of vegetable-tanned leather, debossed with Cocoknits
- Hangable Kraft box with window

As always, please note: these are snips, not scissors, and they are imperfectly hand-forged. They have a nice heft in the hand, and the good news is that no one is going to borrow them from your knitting kit – they are really only good for snipping yarn!

They are available to wholesale in bundles of 10 sets as SNP-10 at \$50.00 per bundle.
