

How to build your 500mm Divided Rack:

Step 1 – Measure the glassware:

To construct a divided rack you will need to know the height and diameter of the glasses you are washing. Note: the diameter measurement must be taken from the widest point of the glass which could be either the bowl or the base.

Step 2 – Find your Maximum Diameter in Table 1:

Refer to Table 1 and find the Maximum Diameter of your glassware. This will give you the product codes of the racks you will need.

Note: If the maximum diameter is at the edge of a measurement, we recommend that the larger size is selected.

Step 3 – Find your Maximum Height in Table 2:

Now, refer to Table 2 and find the Maximum Height of your glassware. This will give you a break down of how many racks you need.

The lower cost Open Extenders (600 70040) can be used on any of the divided racks listed below. However if you are washing glasses with a variety of heights and/or delicate glassware we recommend using multiple divided Extender Bs to form your whole rack.

Note: If the maximum diameter is on the cusp of measurements, we recommend moving up a size and completing the top 2 layers of the rack with Extender Bs.

Table 1: Number of Compartments required

Maximum Diameter	Compatible Extenders	
	Extender A (Base Layers)	Extender B (Variable Extensions)
Base Rack	600 70029 \$60	
Open		600 70040 \$18
148mm	600 70048 (3x3) \$25	600 70049 (3x3) \$25
109mm	600 70050 (4x4) \$25	600 70051 (4x4) \$25
87mm	600 70034 (5x5) \$25	600 70035 (5x5) \$25
72mm	600 70052 (6x6) \$25	600 70053 (6x6) \$25
60mm	600 70054 (7x7) \$25	600 70055 (7x7) \$25

Table 2: Number and Type of Extenders required

Maximum Height	Quantities Required			
	Base Rack (600 70029)	Extender A	Extender Open (600 70040)	Extender B
100mm	1 x \$60.00	1 x \$25.00		
141mm	1 x \$60.00	1 x \$25.00		1 x \$25.00
182mm	1 x \$60.00	1 x \$25.00	1 x \$18.00	1 x \$25.00
223mm	1 x \$60.00	1 x \$25.00	2 x \$18.00	1 x \$25.00
264mm	1 x \$60.00	1 x \$25.00	3 x \$18.00	1 x \$25.00
305mm	1 x \$60.00	1 x \$25.00	4 x \$18.00	1 x \$25.00
346mm	1 x \$60.00	1 x \$25.00	5 x \$18.00	1 x \$25.00

Example: 16 Division Rack for up to 148mm diameter, and 183mm to 223mm tall glasses =

= 600 70029 + 600 70050 + 600 70040 + 600 70040 + 600 70051
 = \$60.00 + \$25.00 + \$18.00 + \$18.00 + \$25.00
 = \$146.00 + GST List Price (NZD)
