

800JP (Jazzplate)

The 800JP preamp borrows the EQ section of the famous GK800RB amplifier and squeezes it into an onboard preamp, loaded into a Jazzplate, for you Jazz bass lovers.

This tone stack has some serious high frequency power and a very deep bottom end, just like the amplifier its based on.

The Hi-mid and Treble controls are highly interactive; same goes for the Lo-Mid and Bass controls.

A new feature, the **Contour** Switch, has been added to this new model. It acts as a pre-shape EQ that scoops the mids therefore changing the overall tone spectrum.

This Jazzplate comes in two options; Neck Volume and Bridge Volume or Master Volume and Blend.

Installation and Warranty: This is a solderless preamp. Any tampering with the preamp (ex: soldering or unsoldering directly on the preamp or any of its components) can result in Warranty void.

!!!!MAKE SURE THE JACK IS FULLY INSERTED!!!!

-**Treble:** Boost and Cut around 4khz

-**Hi- Mid:** Boost and Cut at around 1khz
