

## Double NFP Preamp

The NFP is a filter preamp alike the ones seen on basses like the Alembic or Wal. Being a low pass filter, it lets all bass frequencies pass through up to 4Khz where it starts cutting. The cutoff point has a resonant peak that can be boosted by pulling-up on the potentiometer. The potentiometer also allows you to sweep the cutoff point(resonant peak) within a range of **150Hz to 4 khz**.

The Double NFP has one filter per pickup ,offering more tone shaping options, that are actively mixed through the pan/blend potentiometer and into a Master volume potentiometer.

**Operation:** 9 to 27volts    **Current Draw:** +- 4.5 mAh

**Dimensions:**                      **Filter boards** x2: W: 3.3cm; H: 2.3cm; D: 1.7cm  
   **Potentiometers:** Hole size is 6.5mm, and bush height is 10m  
   **Blend board** x1: W: 3.9cm; H: 2.5cm; D: 1.3cm

**Important Note:** To avoid mechanical failure of the Filter boards, **do not** overtighten the nuts on the potentiometers when mounting the preamp.
