ARNE JACOBSEN® CLOCKS

2023 COLLECTION

BRAND CHARACTERISTICS

ARNE JACOBSEN CREATES DESIGNS THAT STAND THE TEST OF TIME

The Danish and internationally recognised architect Arne Jacobsen mastered many different design disciplines to their fullest.

Each design discipline helped Arne Jacobsen in the realisation large and small projects from architecture to interior, furniture design and graphics.

The complete expression his many different designs came to life in the details, just as the details came to life in the expression.

Arne Jacobsen's architecture and design sparked interest everywhere.

The magical thing is that they continue to today, recreated according to the master architect's original drawings.

ARNE JACOBSEN IS FUNCTIONAL, MINIMALISTIC DESIGN THAT LASTS

The Greatest Modernist of Our Time

Arne Jacobsen grew up in a middle-class home that was decorated in the ornate Victorian style popular at the time.

As an architect, he dedicated his career to stripping down and rethinking products and structures from a functional, minimalist perspective.

Architecture, in the form of residential and public buildings was the starting point of Jacobsen's career, but he was interested in far more than a building's exterior.

He also designed interior elements - furniture, textiles, tableware, fixtures and fittings, door handles, clocks and much more.

Time passes. Design lasts.
