our ambition has been to challenge extraordinary through great design. nality and endurance characterized by silhouettes and durable materials, contemporary design that withstand of time.

across the world and improving the the power of great design. design and accommodate the diversity and professional interiors alike. the making of meaningful spaces that of the global leaders in design.

Swell Armchair in various textiles

MADE WITH CARE

At Normann Copenhagen, we believe in products that can last a lifetime. Long-lasting designs and durable products can contribute to improving the quality of human life, while representing a more sustainable way of consumption. We acknowledge our position as a leading design company and thus our role in helping create a more sustainable industry. We're not perfect, but we constantly strive to employ conscious practices throughout our business activities and positively impact those engaged with our business.

RESPONSIBLE DESIGN

We believe that longevity and durability is at the core of sustainable design. By creating high quality products, we invite people from all over the world to bring the world famous Scandinavian design heritage and craftsmanship into their lives. Our products are made to last – whether they adorn grand hotels, cozy cafés or family homes.

SOURCING RESPONSIBLE MATERIALS

When developing a new design, our skilled team of in-house designers and engineers challenge existing ways of production and utility of materials in order to create products that are manufactured in the most responsible way. A large part of the design process consists of reflecting on materials, their quality, durability, origin, environmental impact and life cycle. Our sourcing team works hard to select the best materials from the best-in-class suppliers, and continuously strives to optimize our use of materials in order to minimize our environmental impact on our surroundings. We constantly seek new ways to introduce circular materials in our production.

Herit Chair during production

CONSCIOUSLY COOPERATING

We strive to produce the majority of our products in the regions they are sold. Producing locally is crucial to reducing emissions and waste generated by global transportation. Normann Copenhagen operates in two main regions: The European Union and the Asia-Pacific region. We have similar production facilities as well as local supply chains and distribution in these regions, reducing unnecessary transportation from one country to another, reducing our carbon footprint significantly, while supporting local craftsmanship and its workforce.

Our in-house design and product development team have spent years establishing close relationships with carefully selected suppliers. Over the years, we have built long-term relationships and established a dialogue based on trust and a shared responsibility. We regard our mission to become more sustainable as a collective responsibility between us and our suppliers. Together, we are working towards a more sustainable industry, striving to optimize our operations to become more responsible.

RESPONSIBLE PACKAGING

We're committed to ensuring that all our products are wrapped in responsible packaging that is safe for the product as well as the environment. We want to make sure your new Normann Copenhagen products arrive safely while also taking the environmental impact of our packaging into consideration. Therefore, the majority of our packaging is made from recycled materials and can be repurposed or recycled after use.

HEALTH, QUALITY AND SAFETY GUARANTEES

We are committed to ensuring that our products live up to our high quality standards. Through large scale test phases and certifications, we continuously improve and adjust our products before introducing them to the market. This is your guarantee that our products comply with the highest standards in quality and emission testing as well as load capacity. The EN strength and stability testing is the official European Standard testing that specifies requirements for the stability, strength and durability of all types of seating for adults, while the ANSI/BIFMA is the North American equivalent to the EN tests. During the testing, loads, forces and velocities are applied to the chairs, stimulating the normal functional use as well as misuse that might be expected to occur. These tests are your guarantee that our furniture is safe and durable.

Indoor air quality is highly important to your health and well-being, and we are committed to setting high standards for our furniture's part in creating healthy indoor environments. We test furniture emissions to ensure that our furniture contributes with a good air quality in indoor environments. These tests reveal that not only does our furniture comply with the standards set forth by the World Health Organization, the detected emissions are significantly lower than the recommendations. This is your guarantee that our furniture is a safe choice for a healthy indoor air environment. Discover all test reports in our online media bank.

REPURPOSING PLASTIC WASTE

ALLEZ CHAIRS

We are working on minimizing the unnecessary waste from our own production sites. Scrapped material from the production of our Allez Chairs is granulated, painted black and reused for the black version of the chair.

HERIT CHAIRS

The Herit Chairs' polypropylene elements are made with 30% recycled post-industrial polypropylene. By using the excess material from our own production, we're able to ensure a minimum amount of waste.

BIT STOOL

The Bit Stool is made from 100% recycled industrial and household plastic. The material is heated to an exact 120°C melting point, making it possible to repeatedly reuse and reheat the material without altering its properties, thus ensuring a circular life cycle.

POLLI RUG

Polli Rug is made from 100% recycled post-consumer PET yarn. The plastic waste is pre-processed into short textile fibers, which are spun into a fine yarn and woven into soft, ultra-durable Polli Rugs.

FORM

The Form Chair is an uncompromising design that combines a strong design idiom with comfortable curves and an innovative industrial technique. The sleek mounting solution developed especially for the Form Chair creates a natural integration between seat and base, making it possible to customize the chair with different types of bases to accommodate different settings.

Form is a contemporary shell chair made of molded plastic. The chair comes with or without armrests, as a barstool in two different heights, with different types of swivel bases and as a stacking chair.

The shells are all created of the highest quality recyclable polypropylene and have been molded using one single injection. That way you achieve an extremely strong construction with the finest and clearest surface possible. The wooden bases are assembled and sanded by hand after they are cut. The steel legs are produced in thick and strong steel pipe. The base is welded together by hand, making the use of screws unnecessary and the construction more durable.

Since the initial idea, it took 3 years to develop the Form series. During the process angles have been corrected, curves have been adjusted, colors have been tweaked and more than 20 prototypes with various angles and material thicknesses have been tested to find the right solutions and achieve the best comfort possible. The result is an uncompromising design, which blends craftsmanship with design history.

The molded shell is based on well thought out curves, which follow the body and ensure optimal sitting comfort. For example, the seat is wider to accommodate various body types. It also gives you room to change your position, so you sit comfortably for a longer period of time.

The goal was also to create a flexible design that could be adapted to countless types of bases, including the ones that will emerge in the future. The easiest and most common way to achieve this is by making several holes underneath the shell to fit the different bases. Form on the other hand, has raised the bar and prioritized exclusive and well-executed details. The connection principle developed especially for the Form Chair makes it possible to mount different types of bases in the same holes. As a result, Form is a homogenous and aesthetic design, and can be customized from more than 100.000 possible combinations of models, colors, textiles and bases, offering a wealth of opportunities for creative expression.

HYG

Inspired by the Danish concept of hygge, designer Simon Legald has created a contemporary multipurpose chair series that performs as impeccably in comfort and endurance, as it does in adding warmth and ambiance to the interior. With its welcoming expression and resilient construction, the Hyg Chair and Barstool are ideal for a wide range of spaces.

ALLEZ

A new generation of café chairs, Allez is a design without compromise. Designed to adapt to numerous uses and created with sustainability at its core, Allez is a versatile chair for both indoor and outdoor use.

Allez Chair in Black, White and Park Green

The different components for Allez Chair

Inspired by French bistro culture, Allez gives a contemporary look and feel to the traditional café chair's soft idiom and constructive strength in terms of design, functionality and sustainability. The result is a flexible design that still nods to a bygone era but has now been adapted to suit even more environments and user scenarios. Allez has a light and airy look, and the design idiom draws on recognizability. The designer's signature principle of an honest design suited for modern needs is clearly evident in the shape of the Allez chair. Designer Simon Legald explains:

"Most chairs are based on a construction consisting of a type of shell and a frame. By breaking up the chair into components, it can be shaped and adapted to suit different environments. The construction was a key motivation in the design and is what makes Allez so innovative and unique."

The Allez Chair's components are available in several variants, allowing the customers to put together a design to suit their personal style and needs. The discreet dimensions make the chair easy to push under a table, while the design fits in just as easily in a small home as in dining areas with multiple seating. For the outdoor life on terraces, sidewalk cafés or parks, the chair seat is available in solid-cast polyamide, where a discreet cut leads away water. For increased comfort, the chair is available to order with color-coordinated seat upholstery in quality fabrics from Camira and Sørensen Leather, and also comes with OEKO-TEX-certified outdoor upholstery from Sunbrella. Furthermore, the seat is available in molded weave to add a little extra French bistro charm to a restaurant or home balcony. To add warmth and contrast to the frame, the chair legs are available in oak, which is particularly suitable for dining rooms or indoor seating areas in restaurants. Allez is available in five timeless tones, each reflecting the stark and beautiful Nordic nature. A balanced and neutral color palette of park green, grey and warm grey, as well as black and white, allows the design to humbly fit into larger contexts and outdoor environments. The color scale supports the desire for a design that will stay relevant for many generations to come.

Herit Armchair in Dusty Green with smoked oak legs and upholstery

Herit Armchair in Sand with oak legs and upholstery

HERIT

Danish design traditions have left a clear mark on the Herit Chair, which is short for heritage. The series came to life from a desire to design a versatile and strong chair that unites the different eras of Danish design. Oak and polypropylene merge in tactful synergy to create a hard-wearing, maintenance-friendly and accessible design crafted for modern life.

OFF CHAIR

UNITING COMFORT, FUNCTIONALITY AND AESTHETICS

Off Chair Low with cushion

Off Armchair Low Swivel with aluminum legs, five wheels and cushion

Off Armchair Low Swivel with aluminum legs, five wheels and cushion

Off Chair is crafted with a specific focus on catering to the need for aesthetic office environments while providing a highly functional and versatile task chair with a meticulous attention to detail and comfort. Off Chair provides all the classic functions of a task chair with essential technical elements such as gas lift and tilt functions beautifully integrated into the construction of the chair. The design offers immediate comfort, providing the ideal conditions for a good working posture throughout the day. Equally suitable for home offices and corporate workplaces, Off Chair is designed for environments where high sitting comfort, functionality and an aesthetic design are of great importance.

With specific attention to creating a timeless design, Off Chair's design idiom applies uncomplicated, straightforward silhouettes for a classic, ever-relevant design. Off Chair obtains its minimalist expression through its rectangular, yet slightly rounded frame. Soft upholstery complements the cool shine of the aluminum, presenting a contrasting, tactile expression. The high back is crafted with attention to providing optimal support for many hours by the desk and can be selected in either low or high versions for additional support.

The legs and armrests come in polished aluminum or black powder-coated aluminum, and the base is available as either a four-star fixed based or five wheels for extra mobility. The five wheel base offers the additional mobility of tilt and gas lift functions, providing extra flexibility. A subtle cover discreetly integrates the mechanical components beneath the seat – an innovative solution designed to expertly incorporate the technical components into the design. A small lever handle enables the tilt function to be either locked in a static position or unlocked for unrestricted tilt movement. Off is available with optional cushioned pads, which, in addition to their aesthetic appeal, serve to provide the design with further comfort. The seat and backrest come in either high or low in a wide selection of various fabrics and leathers, providing an array of color choices for personal customization. The possibility of choosing a chair with or without armrests allows for tailoring it to any specific need, taste or setting.

The versatile chair serves to unite form and function in a timeless design while catering to the needs of modern office spaces in residential, commercial and corporate settings.

DRAPE

WELL-BALANCED AND UNCOMPROMISING COMFORT

Drape Lounge Chair presents an uncompromising design, in which comfort and aesthetics go hand in hand. Distinguished by its organic design language, the comfortable seat is elegantly draped around the base of the chair, offering visual balance and unparalleled comfort. A celebration of the minimalist lines and sublime craftsmanship, Drape is a modern lounge chair with visible references to the traditions of its Danish design heritage. Soft, rounded curves make Drape visually appealing while highlighting the extensive comfort of the chair. The characteristic draped shape serves more than just an aesthetic purpose: The wide armrests support countless different seating positions, providing the conditions for a comfortable lounging experience for hours on end.

Drape's organic disposition is balanced by a slender, utilitarian base. Elegantly elevated around the base, the shell gradually evolves into armrests as a natural extension of the backrest. To accommodate the many preferences and settings of modern life, the versatile lounge chair is available in several different versions. Drape Lounge Chair High offers a higher backrest with an optional headrest for additional support. Crafted from long-lasting materials, the legs are made from either powder-coated steel or solid oak, while the shell itself is formed in rigid PU foam with a steel reinforcement structure inside. For the cushions, soft PU foam ensures additional comfort.

Available to tailor to any preference or setting, Drape can be upholstered in an extensive selection of textiles and leathers from Kvadrat, Camira and Sørensen Leather, each offering a broad spectrum of colors and nuances to choose between. As an added decorative detail, Drape can be customized with contrasting textiles and leathers for the piping and cushion upholstery.

Designed to last, the durable materials and timeless expression makes Drape a relevant furniture piece for many years to come. Crafted with a specific focus on creating a chair that would fit seamlessly into any lounge setting, the aesthetic lounge chair is perfect for lobbies and receptions as well as living rooms and cozy reading nooks. In total, Drape is a contemporary lounge chair with a soft, enveloping appeal expressed through its classic and timeless silhouette.

ARK

The design of the Ark Armchair elegantly unites the clean lines characteristic of Danish design heritage with a soft, visual expression.

The comfortable cushions and subtle arches are as pleasing to the body as to the eye.

Ark Armchair

Ark Armchair

Swell Armchair

SWELL

Swell is a minimalistic furniture collection with a playful, light-hearted feel designed by the Swedish designer Jonas Wagell. The Scandinavian simplicity of the design is accentuated by a stringent design without unnecessary details. In spite of this, Swell oozes character and personality and its soft, curved shapes make it both inviting and provides an impeccable seating comfort.

Swell Armchair

Swell Armchair in various textiles

Sum Armchair with aluminum legs

SUM

Sum Armchair is characterized by its slender frame and elegant expression. Slim, angled legs lift the sophisticated lounge chair from the floor in a delicate counterpoint to the generous contours of the back and armrest, offering sophisticated aesthetics and exquisite comfort in equal measure.

Sum Armchair with Black aluminum legs

SOFAS

ARK
ROPE
SUM
SWELL

ARK

Subtle arches, plump cushions and an airy base are all dominant features of the new Ark Modular Sofa. The design plays with curves and volume, making Ark appear almost as a sofa built solely from cushions and alluding to its soft, welcoming expression.

Ark Modular Sofa 3 seater

Ark Modular Sofa 3 seater

Ark Modular Sofa is a marriage of unparalleled comfort, modular flexibility and contemporary elegance. The sofa comes in several different modules, including a one-seater armchair, all elevated by their minimalist yet organic lines, giving the design a distinctly soft appearance. Designed for modern spaces where flexibility and timelessness are in high demand, Ark's modularity combined with its long-lasting materials and expression accommodate exactly that.

A recurring element in the design, Ark gets its name from the Danish word for arches. The sofa radiates relaxation and comfort, its construction seemingly divided into smaller, pillowed sections. Each section is distinguished by the subdued crescents of the cushions which, besides their soft visual expression, gesticulate at the equally soft seating comfort. This voluminous composition contributes to Ark's embracing appeal, while the simultaneously simplistic design draws on references from the classic minimalism characterized by Danish design. The slight space between the seat and floor lends airiness to the design, while also presenting a practical advantage, providing access for easy cleaning below the sofa. Designer Simon Legald elaborates:

"The goal was to design a sofa that was practical, comfortable and flexible while still adhering to a light, simplistic idiom."

The flexibility of Ark is emphasized in its modular construction comprising four different modular units. Providing the possibility to choose between two end modules, a center module, a corner module or a one-seater, Ark can be customized to any need or space. A wide range of high-quality upholstery options offer further possibilities for personal expression.

Ark is built using a spring system and a combination of high-density foam, low-density foam and wadding, providing maximum comfort. The frame rests on slender legs made from powder-coated steel, elegantly lifting the sofa from the ground, making the design appear airy and light.

Ark's embracing silhouette and sophisticated expression makes it an obvious choice for furnishings in residential and commercial settings alike.

Ark Modular Sofa 2 seater

Ark Modular Sofa in various combinations

Rope Modular Sofa

Rope Modular Sofa with three modules

Rope Modular Sofa with five modules and pouf

Rope is a stringent modular sofa with clean lines and softly rounded corners. The simplistic design puts an emphasis on flexibility and comfort, and combines traditional upholstery techniques with a timeless expression. Rope combines minimalistic features with a deep, spacious seat and an understated, elegant backrest. Designed to accommodate the need for ultra comfortable lounge furniture, Rope prompts you to relax and stretch out for hours on end, without compromising on the aesthetic appeal.

Simultaneously timeless and contemporary, Rope draws references from the classic lounge furniture of its Danish design heritage, while accommodating the many needs of present-day life. Inspired by the timeless details of classic design, Rope is adorned with a distinctive piping that elegantly frames the edges throughout the sofa, while the flexibility of the modular construction embraces the diversity of needs of modern lounge environments.

The Rope Modular Sofa's composition is constructed with pocket springs and foam for unparalleled comfort. The designer, Hans Hornemann, elaborates:

”In order to achieve the highest levels of comfort, we have built the sofa with pocket springs and foam. The foam ensures soft seating that shapes itself according to body contours. The pocket springs, which are most often used in beds, provide durability and support that feels more alive, because you don't sink too far in.”

Available with a variety of different modules ranging from narrow to wide, with and without armrests, with a chaise longue and without, Rope can truly be customized to suit both the grandest of hotel lobbies and the smallest apartments of urban life. The versatile sofa collection comprises precisely 14 different modules and can be tailored to any setting with hundreds of textiles, leathers and colors to choose between.

Rope Modular Sofa with various modules

Sum Modular Sofa with Black aluminum legs

Sum Modular Sofa with aluminum legs

SUM

Sum is a well-proportioned modular sofa design that stands as the epitome of contemporary elegance. The design is stringent and focused, but invitingly open in character. Elegant and resolute, the sofa spreads out its armrests and invites you into its soft and homely embrace.

Sum Modular Sofa with Black aluminum legs
