LIGHTING NEWS

Normann Copenhagen's ever-growing lighting collection is expanded with the addition of two new lamp designs as well as a line extension of the Rise collection. Meet Pix, a collection of classic spherical pendants crafted from 100% recycled plastic, Tub, simplistic and elegant ceiling and wall lamps and a new, stainless steel variant of the Rise Wall Lamp collection. These new lighting additions find common ground in their use of enduring materials and timeless silhouettes for a design that is long-lasting in terms of both durability and aesthetics.

Pix Lamp Ø30

PIX

A reinterpretation of the archetypical spherical pendant lamp, the recognizable, familiar shape is used for the design of the Pix Lamp collection. The captivating surface of the lamp gets its unique expression from the composition of 100% recycled plastic waste. Pix comes in four different sized pendant lamps, all characterized by the elegant union of the classic globe pendant and the distinctive structure of the granulated plastic waste.
