

The New Cirkulär Refill concept

We've always designed our candle and diffuser glass to be reused.

Now we have expanded our refill options to make it even clearer and easier for our most frequent customers to make a more sustainable choice by introducing candle refills and diffuser refills.

SKANDINAVISK

CIRKULÄR:

- Swedish word for 'circular'
- Our circular logo is an evolution of the mobius loop

Cirkulär – Candle refills

Our regular customers have been requesting this for years...

- Available in 4 fragrances (SKOG, FJORD, ØY & HYGGE)
- Start of shipping, March 1st

DETAILS:

- 200g / Up to 50 hr lifecycle
- Made with Swedish rapeseed wax is sustainably farmed, traceable and non-GMO for the lowest environmental impact
- FSC-certified box from managed European forests with natural colour dyes
- All fragrances compliant with EU regulations
- Made in the EU

How to use our candle refills

- 1. Warm the empty candle glass to melt the residual wax. Check the glass does not have any cracks.
- 2. Wipe out the inside of the candle glass to remove any residual wax. Do not wash with water for eco reasons.
- 3. Insert your candle refill into the cleaned glass.
- 4. Light and enjoy the fragrance.

Skandinavisk's candle refills are recommended for use in our 200g candle glasses. Candle refills must be put into a glass before you light them – failure to do so could cause injury or fire.
