

Green living with minimal effort.

SQUARELY COPENHAGEN

ABOUT US

SQUARELY COPENHAGEN wants to set new standards for Green Living. Born of the desire to build a future where everyone enjoys the uncountable benefits of a truly green environment—at home and work – with minimal effort and for maximal well-being.

Combining a stringent, well-balanced, and modular design with beautiful natural excess wood and a unique self-watering system, **SQUARELY COPENHAGEN** creates a new category of “furniture for plants”. Plants love it, growing effortlessly, inside and outside. Nature and people love it, as **SQUARELY COPENHAGEN** uses and reuses existing material and creates living spaces that clean and refresh both air and mind. Endless possibilities for endless green spaces. Indoors and outdoors

SQUARELY COPENHAGEN was founded in Copenhagen in 2018 by architect Agnieszka Jacobs with the vision of helping designers and private people to create green spaces with minimal effort.
