SQUARELY COPENHAGEN

Our Company

SQUARELY COPENHAGEN is a Danish brand that brings nature into spaces by combining greenery and Danish furniture design to create aesthetic and healthy work environments.

SHOJI | Japanese inspired room divider

With soft screens that combine plants, wood and acoustic textiles, you can divide the room and reduce the noise level.

New concept for green spaces

BIOPHILIC DESIGN

We bring nature into office by combining greenery and Danish furniture design to create aesthetic and healthy work environments

IMPROVES INDOOR ENVIRONMENT

Our products improve privacy and zoning, acoustics and air - as well as employee well-being

SUSTAINABLE MATERIALS

We design to reuse. Our products are made from excess wood and recycled plastic

INTELLIGENT SOLUTIONS

Our product solutions are customizable and scalable, and include an intelligent self-watering system that keeps maintenance at a minimum

MODULARITY

Endless possibilities

SQUARELY COPENHAGEN offers an array of possibilities by seamlessly combining streamlined, natural, and aesthetically pleasing design with an intelligent self-watering system. The versatile modular planters contain two modules: one for plants and one for efficient water supply making your plants thrive both indoors and outdoors.

Highlight your reception and office with carefully selected plants and warm wood to add character to the space and improve the indoor climate

A photograph of a modern office terrace. The terrace is covered with artificial green grass and features several large, rectangular wooden planters filled with various green plants, including tall grasses and bamboo. In the center, a round wooden table is surrounded by wooden benches. Two women are sitting at the table, one using a laptop. A blurred figure of a person is walking in the background. The terrace is enclosed by a glass and metal railing, and the building's structure is visible in the background.

OUR WORK

A greener office

Clever, a Danish company, had a vision of transforming their office into a greener and more vibrant space. To bring this vision to life, they wanted to find a local Danish brand that offered unique products. The result was a stunning urban jungle right on their terrace, nestled in the heart of Sluseholmen in Copenhagen. This transformed space became a fantastic retreat for employees to have meetings or take breaks. As part of the project, they also incorporated a kitchen area adorned with hanging planters and a meeting room featuring a lush green wall. The office managers opted for a variety of wooden Grow planters as they were captivated by the natural and organic look and texture of the wood.

SQUARELY COPENHAGENS products allow dividing the room into zones, improve privacy, acoustics and air quality - as well as employee well-being

SQUARELY COPENHAGEN

Green inspires and makes you relax. The scent and colors of nature stimulate the energies and at the same time provide peace and well-being

"Our architect-designed plant furniture, in a well-balanced, Danish design, aims to introduce more natural materials into the interior."

*Agnieszka Jacobs,
founder & CEO*

ABOUT US

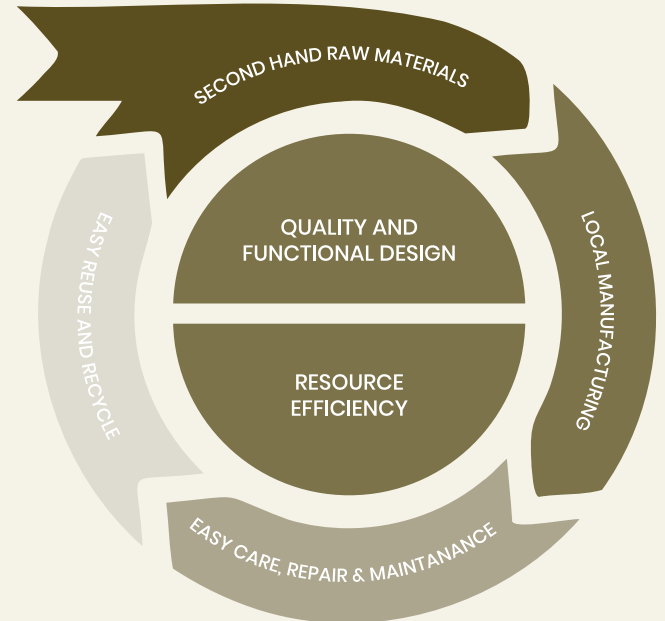

The design and interior brand SQUARELY COPENHAGEN was created by architect Agnieszka Jacobs, driven by a deep-rooted passion for connecting people with nature.

Based on a background of designing sustainable buildings, Aga has created a completely new product category, furniture for plants, which is intended to complement architectural solutions and inspire a greener interior design.

Since 2017, SQUARELY COPENHAGEN has developed and produced high-quality wooden plant furniture, all equipped with a unique, innovative self-watering technology.

OUR CIRCULAR STRATEGY

SQUARELY COPENHAGEN works based on eco-design principles and a circular strategy wheel: Starting from reused material sourcing as the design inspiration, sustainable manufacturing, easy care, upgrade, easy repair and maintenance, leading to possibilities of repurposing and easy disassembly, and potential recovery.
