STEP 9

Plug the cable from the Keypad into the Control Box and flip the table onto its feet.

Power Port — AC | M2 — Lifting Column Ports

Lifting Column Ports — M1 | HS — Keypad Port
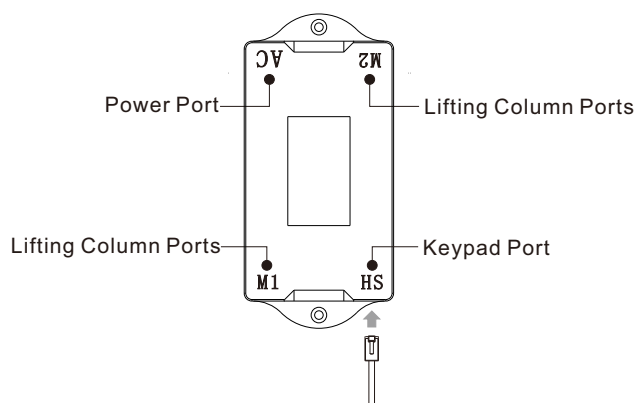

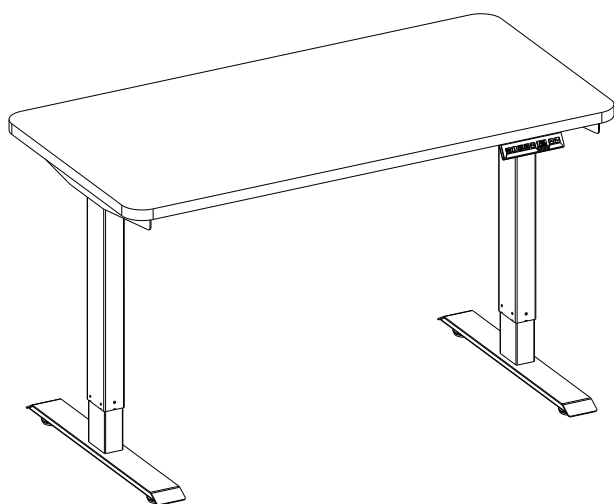

Note: The Control Box is equipped with a gyro sensor so the table and the Control Box must be level in order to work properly or else it will not move up and down.

Prepare for First-time Use

Memory · Programmable Presets · Desk Height · Up and Down
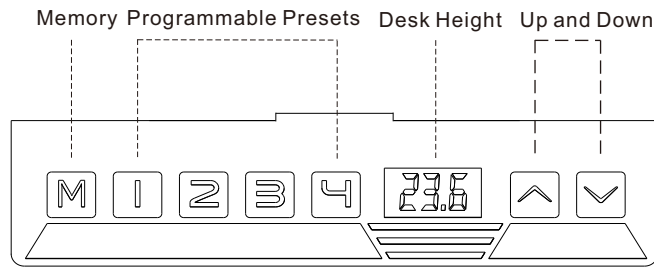

Before plugging in the table, make sure that:

- The Lifting Columns are level and set at their lowest position.
- All the screws are tightened to avoid the desk from becoming wobbly.
- There is no object above or beneath the desk within its range of movement as it may result in physical damage.
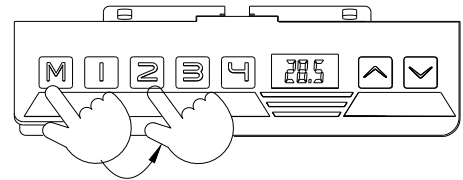

Calibrate the desk by following the steps below:

- Please press the Down button and hold for 10-15 seconds until the table stutters and beeps.
- Release the button. Your desk is ready to use!

Operation Guide

Program Presets

- Adjust the table to the desired height, then press M. "S-" will flash on the display.
- Press a number to set the desired height as a preset.

Set Stand Up Reminder

- Press and hold the number 1 and 3 buttons at the same time.
- When display shows "0.0h", press the Up or Down arrows to adjust the reminder time by 30 minute (0.5 hr) increments.
- Once the display stops flashing, your reminder has been set.
- Repeat above steps to set another reminder for next time.

Advanced Safety Feature: Lock and unlock the table

- Press the Up and Down buttons at the same time for 5 seconds, until "LOC" appears on the display.
- All buttons will be deactivated and no changes can be made.
- Press the Up and Down buttons together again to unlock the Keypad and all of the table's features.
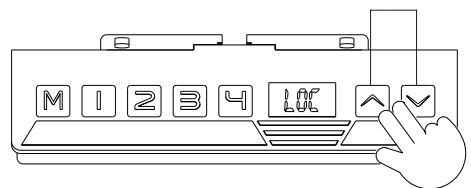

Set Maximum Height Limit

- Raise the desk to the desired maximum height.
- Press M and the Up button together for 5 seconds until you hear a beep. This sets the maximum height limit.

Set Minimum Height Limit

- Lower the desk to the desired minimum height.
- Press M and the Down button together for 5 seconds unti you hear a beep. This sets the minimum height limit.

Changing from Centimetres to Inches

- Press M for 10 seconds, the Keypad will display "1-1".
- Press the Down button and it will change to "1-0".
- Press M for 10 seconds to lock the setting.

Reset the table
### When an error code or "RST" appears on the display, please reset the table.

- Unplug the power cord from the Control Box.
- Unplug the cable that connects the Keypad to the Control Box.
- Wait 30 minutes and plug all the cables back in again.
- Press the Down button and hold for 10-15 seconds until the table stutters and beeps.
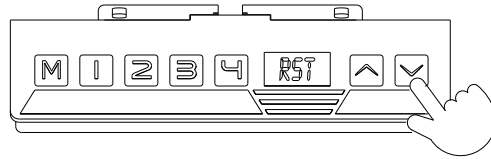

Press by holding
10-15 seconds

If "HOT" appears on the display

- Please unplug and replug and let it cool off for a couple of minutes before proceeding.
