

WATERCARB 1000

High Performance Powdered Activated Carbon

Description Watercarb-1000 (WC-1000) is a very high quality activated carbon produced from select raw material under strict quality control conditions.

Applications WC-1000 has excellent removal properties for taste / odor and TOC from potable water supplies. WC-1000 is extremely effective in removal of MIB, Geosmin and algal toxins from raw water. Watercarb products exceed AWWA B600 and are certified to ANSI/NSF Standard 61.

Specifications / Properties

Iodine Number, mg/g	1,000 +/- .5%
Moisture as, % packed.....	<8
Bulk Density, g/cc.....	0.3 - 0.5
Less than 325 Mesh, %.....	>70

Manufacturer Standard Purification is an innovative, activated carbon manufacturing company focused on practical, environmentally-superior solutions to customers' problems. We develop and manufacture custom tailored, activated carbon products for removing contaminants from liquids and gases. Standard Purification utilizes a reclaimed raw material in many products and uses only heat and steam for carbon activation.

Delivery WC-1000 is available for delivery in bulk via pneumatic tanker trailer.

Safety and Handling Wet activated carbon removes oxygen from the air. In closed or partially closed containers and vessels, oxygen depletion may reach dangerously low levels. Workers should follow appropriate procedures when entering confined spaces containing activated carbon.
