

VitalOxide

Odor Eliminator

Don't Cover Bad Odors, Get Rid Of Them !

Vital Oxide is an EPA registered product super effective odor eliminator. Ready to use, with no mixing required, just spray or wipe right from the bottle. Vital Oxide eliminates a wide range of bad odors, from left over food odors in the kitchen to cigarette smoke odors in the car. Vital Oxide gets rid of bad odors attacking the odor causing bacteria without damaging the surfaces or articles treated.

Application Methods

- Vital Oxide must come in contact with the source of the malodor to eliminate it. Remove excess soil from area causing the malodor, then saturate the area with Vital Oxide and allow ventilation to air dry.
- Vital Oxide can be used in areas where there is bad odor present, just use the fogger to apply Vital Oxide directly to the area causing the malodor after removing visible filth or dirt.
- Spray on porous surfaces like concrete or wood. Dirt often hides in the ridges or dimples of a porous surface. Remove as much dirt as possible apply Vital Oxide and allow to air dry.
- Direct injection into carpet padding, cushions and bed padding.
- Can be used with carpet extraction machines and steam cleaning machines.

How To Use Vital Oxide In Your Car?

- ① If you've ever eaten while driving you know that even if you're careful you're still going to get food particles spilled on the driver seat, the floor mat or even the ridges between the seats. If they are not picked up and cleaned in time, those food particles are going to sit there while the sun is beaming through the windshield heating up the inside of the vehicle and decomposing the crumbs thus creating bad odor. Vital Oxide eliminates bad odor on a molecular level getting rid of bad odors from the source, fighting the organisms that cause foul odors.
- ② We can control the odors from inside of our vehicles, but we can do very little to control outside odors. One thing we can do is to make sure that the air coming in from the air conditioner vents is clean, bacteria and mold free. Apply Vital Oxide to the air intakes of your vehicle to ensure a good disinfection of all the vents and ducts of air flow, allow time to air dry and you'll feel a difference in the air quality inside the vehicle.
- ③ Smoke odors including tobacco can be very hard to get rid of from the seats and mats of a car, aside from that, unpleasant odors have been recognized as a warning sign of potential risks to human health. Vital Oxide eliminates odors with its hypoallergenic formula and contains no fragrances. Vital Oxide can be used by the most sensitive allergy sufferers.
- ④ The trunk of a minivan is a spot designed for carrying all kinds of groceries, coolers, sporting equipment and toys which are not always in the cleanest conditions and can leave foul odors on the mats. Use Vital Oxide to control bad odors coming from meat juices dripping from grocery bags or simply a pair of soccer cleats that have been left in the trunk of the van for a little too long.
- ⑤ For those parents with little ones riding on the back seat, you know that if your child is still drinking milk out of a bottle they are going to spill it. It's inevitable. Once again, if milk gets spilled on the back seat, the cloth material of the seat will soak up the milk and keep it there until it gets cleaned. Temperature changes and the untreated area will make the milk to go bad and start emitting a bad odor. This can be controlled with a spray of Vital Oxide.
