- Good for Heart Health
- Supplement Your Daily Nutrition
- Helps Support an Alkaline Diet
- 9 Organic Superfoods in One Scoop

### Move over green drinks – there's a new kid in town

Traditionally green drinks suffer from two problems. First – the taste. One glance at green drink reviews will show you exactly how polarizing the taste can be. Our personal favorite found on a competitor's review is "it tastes like week old lawn clippings." Ouch!

So HeartGreens took the flavor issue seriously. And tackled it head on. And we're pretty sure we nailed it. Our scientists took certified organic ingredients to create the perfect blend. Combining 6 alkalizing greens and 3 organic fruits to create a powerful, heart healthy, great tasting greens drink, and the refreshing Green Apple flavor we're so proud of.

The second problem of green drinks is quality of ingredients. Specifically, how many nutrients extract into the powder. We didn't just walk down the vegetable aisle and grab everything that was green to put into our powder. We took advantage of the latest and greatest research on heart-healthy greens and fruits, and carefully selected only the best 6 alkalizing greens and 3 super fruits for the NEW HeartGreens.

Our researchers did the hard work so you don't have to. And created a superfood formula you can finally enjoy!

And the best part...You can pronounce ALL the ingredients. Because we didn't fill it with unnecessary fillers or scientific ingredients to get the nutrition in. No, we use REAL greens and REAL fruits.

Wheat seeds that have sprouted to unlock their nutrients. Wheatgrass also contains chlorophyll, amino acids, and valuable antioxidants. Wheatgrass is naturally gluten-free.

A member of the cruciferous family, kale is also one of the best sources of vitamin K1 and antioxidants, vitamins A and C. Spinach is a hardy, dark leafy green that is a natural source of nutrients such as folate, magnesium, and calcium.

A heart-healthy fruit full of vitamin C, folate, and potassium. Commonly found on the "dirty dozen" list our strawberries are proudly organic.

The fleshy seeds (arils) house its potent source of antioxidants – punicalagin – to help support a healthy heart and reduce oxidative stress.
