

# OVERNIGHT SPOT TREATMENT

Blemish Clearing Formula

For Acne-Prone Skin

SKIN CONDITIONS

Acne-Prone | Problem

SKIN SYSTEM

Treatment

ACTIONS

- Quick relief from blemishes.
- Easy application process.
- Ideal product for all clients with acne-prone/oily skin.
- Contains high-powered actives for effectiveness.

DESCRIPTION

Opaque nighttime target treatment with sulfur, salicylic acid, and camphor helps soothe inflamed blemishes while you sleep. A single application can greatly reduce swelling and redness in bad breakouts.

ACTION  
INGREDIENTS

**Precipitated Sulfur:** For centuries sulfur has been used in the effective treatment of skin conditions. Germicidal benefit successfully combats inflamed blemishes and cystic acne.

**Salicylic Acid:** A beta hydroxyl acid that effectively unglues dead cell buildup in pores and minimizes debris that causes breakouts.

**Calamine:** A gentle skin calming agent.

INGREDIENTS

**Active Ingredients:** Sulfur (10%) **Inactive Ingredients:** Isopropyl Alcohol, Water, Zinc Oxide, Camphor, Magnesium Aluminum Silicate, Salicylic Acid, Iron Oxides.

DIRECTIONS

**Do not shake solution.** Cleanse the skin thoroughly before applying medication. Dip clean cotton swab into sediment and apply directly to blemishes. Because excessive drying of the skin may occur, limit use to one application daily, or as directed by a doctor.
