

HOME REJUVENATION PEEL ACNE/ROSACEA/SENSITIVE SKIN

This home care peel is perfect to clear blemishes, reduce inflammation and strengthen the health of your skin – lending to a vibrant, more youthful complexion. It is essential to only do this peel once every 14 days minimum and use the post care provided during the healing process. This allows the skin to completely heal and properly rejuvenate. If you peel too closely together, you will interrupt the healing and rejuvenation process.

This essential redness relief peel system uses the exfoliating support of salicylic and tartaric acids, the anti-inflammatory benefits of green tea, and the healing power of mandelic acid to improve the overall appearance of skin for a beautiful, healthy-looking complexion.

PRODUCTS USED

Green Tea Beta Cleanse

Cherry Jubilee Enzyme

Mandelic Clear Complex

BHA Refine Gel

Salicylic A Serum

Omega 7 Complex

Calming Milk Cleanse

Growth Factor Serum

HA2O Spritz

HOME PEEL DIRECTIONS

Step 1: Cleanse skin with our antibacterial, salicylic **Green Tea Beta Cleanse** for a thorough, deep pore cleanse. Massage into skin for several minutes (don't rush this step). Remove with warm water and soft cloth then pat skin dry.

Step 2: Apply a thin, even layer of **Cherry Jubilee Enzyme** to clean, dry skin. Let remain on skin for 10 minutes. Rinse with tepid water and 4x4 gauze or cloth. Gently pat skin dry.

Step 3: Dispense 1-2 pumps of **Mandelic Clear Complex** onto fingertips and massage into skin. This is a strengthening serum that softens texture and increases cellular energy. Let product absorb and remain on skin.

Step 4: Dispense 1-2 pumps of **BHA Refine Gel** onto fingertips and gently massage into skin. Let product absorb and remain on skin.

Step 5: Finish by applying 2-3 pumps of **Salicylic A Serum**. Let this absorb and remain on skin overnight. If skin feels dry, apply **Omega 7 Complex** overtop.

POST-PEEL DIRECTIONS - Follow these steps for the next 5-7 days, AM and PM.

Gently cleanse with our soothing **Calming Milk Cleanse**. Remove with tepid water and soft cloth, then pat skin dry.

Next, promote healthy cell renewal using potent epidermal growth factor. Dispense 1-2 pumps of **Growth Factor Serum** onto fingertips and apply to clean, dry skin. Skin may experience a warming sensation which will subside in a few minutes.

Dispense 1-2 pumps of **Omega 7 Complex** onto fingertips and smooth onto skin. Let product absorb and remain on skin. Use AM and/or PM as needed. Acne skin may skip this step and use **HA2O Spritz** as a hydrator.

Give your skin a much needed "drink of water" using **HA2O Spritz**, an all-natural, moisture-binding hydrator that will leave skin cool and relieved. Mist throughout the day as needed to ease tightness and sensitivities. Store in refrigerator for additional cooling relief.
