 Daytime Defense SPF30
 Omega 6 EFA

PIGMENTATION SOLUTIONS PEEL™ Progressive Plus / Mid-Depth

PREP THE SKIN

Cleanse skin with **Creamy Milk Cleanser** and rinse thoroughly with 4x4 gauze.

Do a second cleanse with **Skin Brightening Cleanser**. Gently massage into skin with steam for several minutes. Rinse thoroughly with 4x4 gauze. Pat skin dry.

ENZYME APPLICATION

Dispense ¼ tsp of **Flower Acid Peel** into glass beaker. Next, dispense ¾ tsp of **Mint Papaya Enzyme** into same glass beaker and blend mixture together. Apply to skin using a firm, square brush and the RA Technique. Leave on skin for 7 minutes.

Rinse thoroughly with cool water and 4x4 gauze. Pat skin dry.

PRE PEEL APPLICATION – HAND FAN TO CLIENT

Wear surgical gloves. Cover client's eyes with eye pads.

Saturate a 2x2 gauze with **Cell Conditioner** – apply an even amount on face and neck using firm pressure. Let product absorb and remain on skin.

Saturate 2x2 gauze with **Mandelic Arginine Peel** – apply an even amount on face and neck using firm pressure. Let product absorb and remain on skin.

Saturate 2x2 gauze with **Melanin Suppressant Solution** – apply an even amount on face and neck using firm pressure. Let product absorb and remain on skin.

PEEL APPLICATION

Dispense 1-2 droppers of **TCA Sake Peel** (Progressive Plus) or **TCA / Salicylic Acid** (Mid-Depth) into glass beaker. Saturate a 2x2 gauze and apply 1 layer to face and neck using firm pressure and RA Technique. Let product absorb and remain on skin.

For additional brightening support mix 1 dropper of **Melanin Suppressant Solution** with 1-2 droppers of **TCA Sake Peel** or **TCA/Salicylic Acid**.

2nd PEEL APPLICATION

Re-saturate gauze with peel solution and apply a 2nd layer to face and neck using firm pressure and the RA Crisscross Technique. Let product absorb and remain on skin.

CAUTION: Once skin begins to frost, stop applying layers and move into **Vitamin A+ Peptide Peel** application.

3rd PEEL APPLICATION

Dispense 5 droppers of **Vitamin A+ Peptide Peel** into glass beaker and mix with 2-3 pumps of **Naturalé Mega Brightening Serum**. Apply mixture to the following areas: forehead, each cheek, chin and neck. Gently work into skin with gloved hands until mostly absorbed. This solution stays on the skin.

FINISHING APPLICATION

Daytime Defense SPF30 may be applied if early in day or **Omega 6 EFA** may be applied if client will be able to sleep in peel.

Have the client sit up, offer a drink of water, and discuss appropriate post peel care.
