

Glycolic Acid Gel Cleanser

The QRxLabs Glycolic Acid Cleanser's advanced formulation combines gentle and effective natural ingredients such as **Coconut Milk, Honey and Sweet Almond Oil** with medical-grade Glycolic Acid in order to provide deep pore cleansing and gentle exfoliation.

With an **optimal 5% Glycolic Acid concentration**, this gel cleanser is sufficiently strong to be highly effective but not so strong that it will leave the skin irritated.

When used 3 to 5 times a week, this cleanser can:

- Help control acne and limit breakouts
- Diminish the appearance of fine lines
- Fade out spots and blemishes
- Improve skin radiance

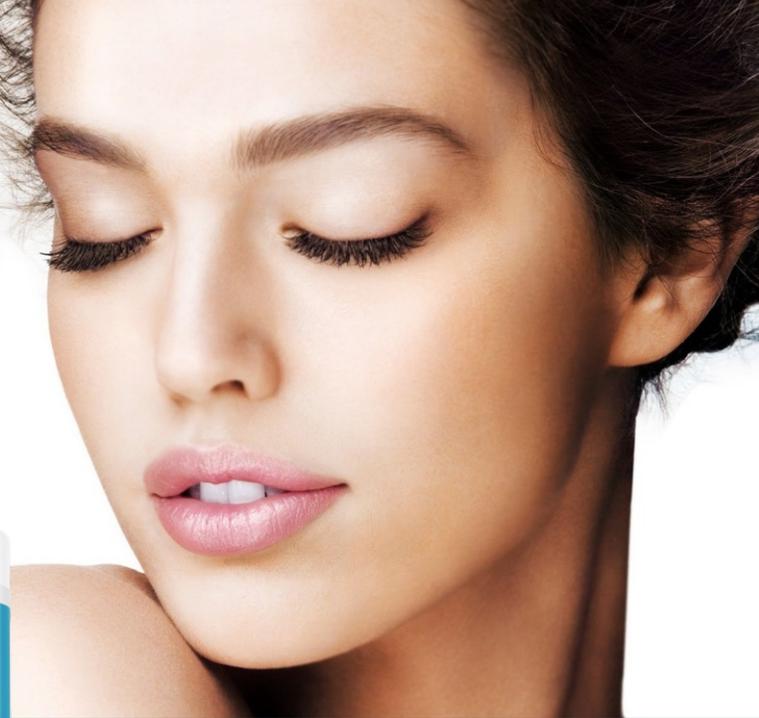

Make this cleanser a permanent part of your skin care routine and start feeling younger, more beautiful and more confident every day.

Glycolic Acid Concentration

Our research and our customers' experience has shown that more is not always better when referring to the concentration of Glycolic Acid in a facial cleanser. While cleansers with very low concentrations (under 4%) are unlikely to be effective, when the Glycolic Acid content is too high (above 8%), there is a much greater chance that skin will become irritated over time. Based on our research, **the optimal Glycolic Acid concentration in an effective cleanser should be right around 5%.**

Our Quality Commitment to You

- Parabens-free and Silicone-free products
- Ecologically responsible product packaging
- Always cruelty-free, with no animal testing
- High quality products always made in the USA
