

Peptide Complex Serum

One important protein in our skin is collagen. Collagen gives our skin its thickness and suppleness. When collagen breaks down in the skin (from age and environmental factors like the sun and stress), wrinkles form. Peptides applied topically to the skin can send a signal to collagen to accelerate the formation of new collagen, leading to the appearance of more youthful, supple skin.

QRxLabs's Peptide Complex Serum combines our **proprietary blend of peptides** with **pure chamomile extract**, a natural ingredient that helps to sooth the skin and to reduce inflammation.

Our advanced formula also contains **hyaluronic acid**, the most powerful skin moisturizer and a key ingredient to help restore and maintain a youthful appearance to your skin.

Our Quality Commitment to You

- Parabens-free and Silicone-free products
- Ecologically responsible product packaging
- Always cruelty-free, with no animal testing
- High quality products always made in the USA

Key Ingredients

Proprietary Peptide Complex

Peptides are chains of amino acids that offer healing and anti-inflammatory properties, helping to repair skin.

Chamomile Extract

Chamomile is a natural antibacterial, anti-inflammatory and antiseptic. It also has hypoallergenic properties.

Hyaluronic Acid

Hyaluronic acid has an extreme ability to retain moisture, which is one of the key factors in skin aging. It helps to maintain a healthy and youthful looking skin.

Witch Hazel

Witch Hazel is a very effective natural antioxidant and astringent, leaving the skin feeling refreshed. It also helps reduce swelling and accelerates healing of bruises.
