

Razor Bump Treatment

Does your skin become overly irritated after shaving? Any bumps, redness or itching? There is now a quick and effective solution to this common issue.

QRxLabs Razor Bump Treatment is a liquid formula that significantly reduces the side effects from shaving or waxing, including so-called “razor bumps” and shaving rashes or burns. This professionally formulated treatment also helps to control skin discoloration while reducing inflammation and improving texture.

Its advanced formula combines pure Lactic Acid with Willow Bark Extract, a natural source of Salicylic Acid. These alpha hydroxy and beta hydroxy acids work together to **prevent ingrown hairs (responsible for razor bumps) and to improve skin texture**, while Allantoin helps reduce skin irritation and burning sensations.

Benefits of daily use:

- Prevents razor bumps and redness
- Has a soothing effect on irritated skin
- Reduces discoloration in areas of concern
- Prevents ingrown hairs

Preferred by Dermatologists
