

Skin Lightening Serum

It is the most advanced and effective skin whitening treatment available on the market today. It combines **Kojic Acid and Alpha Arbutin**, two powerful ingredients, with a combination of natural extracts including Organic Licorice and Lemon Balm in order to form a highly potent serum that will leave you speechless.

This serum will penetrate your skin and it will slow down and regulate the production of melanin, which is responsible for darker pigmentation. Recent research has shown Alpha Arbutin to be a safer and more effective skin whitening agent than some of the other ingredients that have been used traditionally, such as hydroquinone.

Key benefits of continued treatment:

- Lighter and brighter skin complexion through safe and effective ingredients
- Helps to reduce age spots, dark spots and pigmentation issues over time
- Increases and regulates moisture content of the skin for a healthier and younger look
- Reduces visible impact of environmental factors such as UV rays

Preferred by Dermatologists

Our Quality Commitment to You

- Parabens-free and Silicone-free products
- Ecologically responsible product packaging
- Always cruelty-free, with no animal testing
- High quality products always made in the USA

Kojic Acid

A natural skin lightening agent that is extracted from the Reishi mushroom originally found in China.

Alpha Arbutin

The most effective whitening ingredient available on the market. It is a biosynthetic super form of Arbutin.

Organic Licorice

Used for centuries for its natural ability to brighten the skin and to fade blemishes.

Lemon Balm

A natural and safe antiaging and oxidant. It improves the skin's complexion without irritating.
