Operating manual

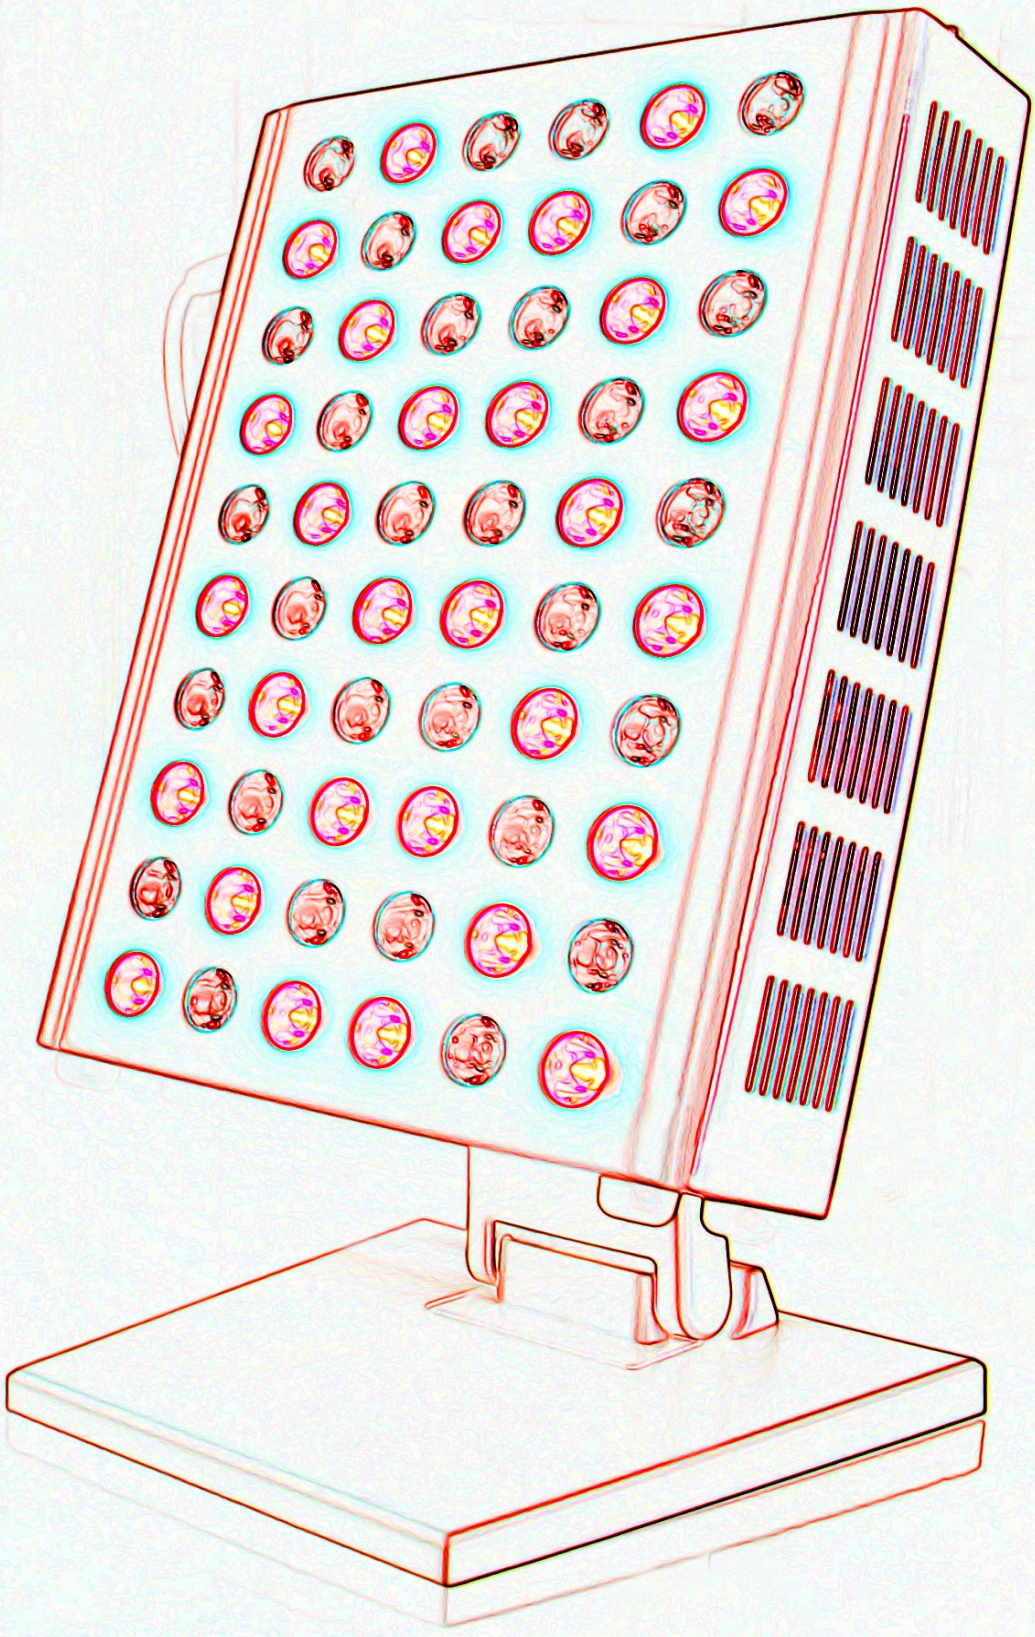

Table of contents:

How to use the timer 3/8
How to use the remote 4/8
How to hang the light 5-7/8
Modular functionality 8/8

How to use the timer:

1. Receiving signal from remote

2. Timer on (T), timer off (N)

3. Timer amount in minutes (max 99 min)

4. Near infrared light status indicator

5. Red light status indicator

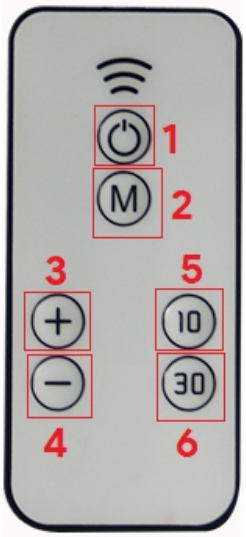
6. Turn timer on/off

7. Turn NIR/Red on/off/both on/both off

8. Add 1 minute to timer

9. Subtract 1 minute from timer

How to use the remote:



1. Turn NIR/Red on/off/both on/both off

2. Start/stop timer

3. Add 1 minute to timer, hold to increase progressively

4. Subtract 1 minute from timer, hold to decrease progressively

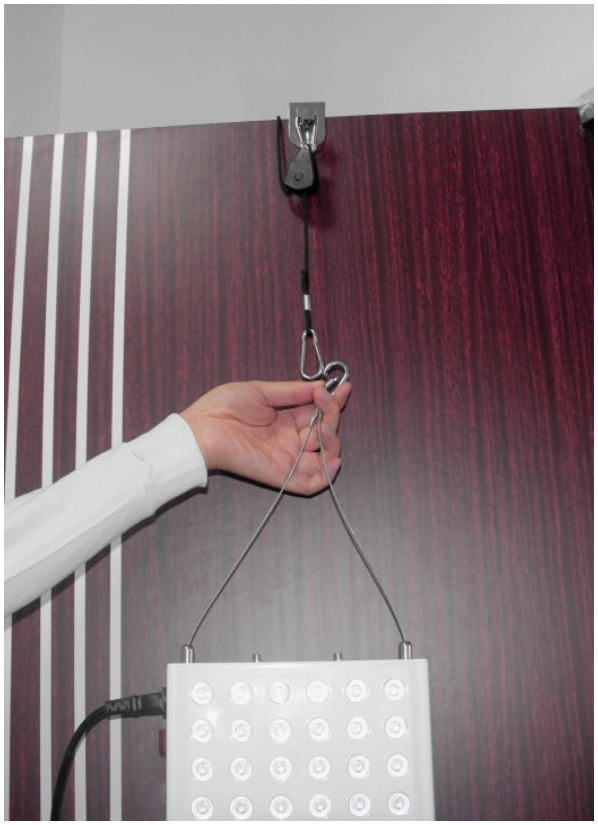
5. 10 minute quick select

6. 30 minute quick select

How to hang the light:

Hang the door hook on any standard door (Duplex, Triplex, High)

Screw the cable supports to the threaded posts located on top of the device (Duplex, Triplex, High)



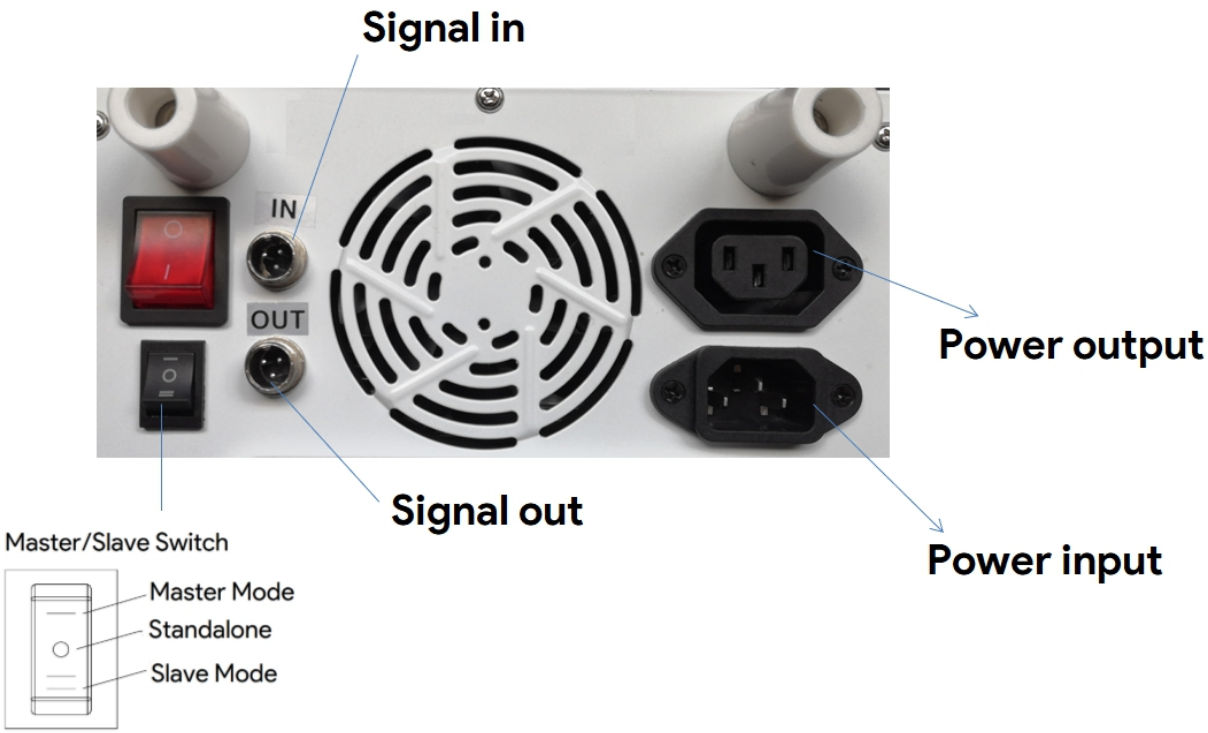
Choose the set of support cables for the desired height of your device.
Connect the cable supports to the snap link that is attached to the pulley system.
Then, connect the snap link on the opposite end directly to the custom door hook.
(Duplex, Triplex, High)

To raise the light to your desired height, pull down on the loose cable while supporting the device with your other hand. (Duplex, Triplex, High)

To lower the light, push up on the level in the pulley system while supporting the device with your other hand. (Duplex, Triplex, High)

Plug in the power cord and flip the switch, the device is ready to use!

Modular functionality:



All of our lights have the ability to be linked together to create a bigger light. This can be done through our modular function and the master/slave switch. Both the power and the signal (timer and red/NIR selection) can be transferred from one device to another. Our large modular lights like the High, Ultra and Apex make use of this function. Anyone can link two or more devices together if they own them, but that requires special cables. If you're interested in getting an additional light to link to your first one, please send us an email and we'll ensure to include these cables when shipping your light.
