VersaBracket™

VersaBracket™ can be used to mount almost anything to an exposed-fastened roof system and is compatible with almost any trapezoidal exposed-fastened profile. No messy sealants to apply! No chance for leaks! The VersaBracket™ comes with factory-applied butyl sealant already in the base, and the S-5! patented reservoir conceals the sealant from UV exposure, preventing drying and cracks.

Installation is simple! VersaBracket™ is mounted in the flat of the panel, directly into the supporting structure of the roof, i.e. wood decking, wood or steel purlins or trusses. No surface preparation is necessary; simply wipe away excess oil and debris, peel the release paper from the base, align and apply. Secure through the pre-punched holes using the appropriate screws for the supporting structure.

VersaBracket™ is so strong, it will even support heavy-duty applications like snow retention. For exposed-fastened trapezoidal profiles, the VersaBracket™ is the perfect match for our ColorGard® or RamGard™ snow retention systems (For corrugated roofs use CorruBracket™). VersaBracket™ is extremely economical and facilitates quick and easy installation.

You asked for it! We’ve got it! Now attach the S-5-PV Kit and PV modules, through DirectAttached™ or Rail methods, along with many more roof accessories to exposed-fastened metal roofing with the S-5! VersaBracket™.

Example Uses

- S-5-PV Kit (DirectAttached™ or Rail)
- RamGard™
- ColorGard®

Attach almost anything to exposed-fastened roof systems, with no messy sealants and no chance for leaks!
VersaBracket™ is versatile! It can be used for almost any attachment need, including S-5! ColorGard®, on all types of exposed-fastened metal roofing. No messy sealants to apply. The factory-applied butyl sealant waterproofs and makes installation a snap!

To accommodate various rib heights, VersaBracket™ comes in two heights—the 2.65" VersaBracket-67™ and the 1.86" VersaBracket-47™. The VersaBracket-67™ mounting face has no holes or slots, thus, ancillary items are typically secured using self-tapping screws. The VersaBracket-47™ offers various mounting face configurations with minimum purchase requirements. (Contact your distributor for available configurations.) Each VersaBracket™ comes with factory-applied butyl sealant in the base. A structural aluminum attachment bracket, VersaBracket™ is compatible with most common metal roofing materials. For design assistance, ask your distributor, or use our web-based calculator at www.S-5.com for job-specific system engineering and design of your next snow retention project. Also please visit our website for more information including CAD details, metallurgical compatibilities and specifications.

The VersaBracket™ has been tested for load-to-failure results on wood decking, metal and wood purlins. The independent lab test data found at www.S-5.com can be used for load-critical designs and applications. S-5! holding strength is unmatched in the industry.
