**COMPONENTS AND STRUCTURE**

**LED WALL LIGHT**

**MODEL: BDB55-3**

1. Cover
2. LED Light Source
3. Lamp Base

**PARTS LIST**

- LED Light Base
- Drill two mounting holes and drive the expansion rubber plugs into them.

**LED WALL LIGHT**

**SPECIFICATIONS**

- **Model:** BDB55-3
- **Output:** 5W
- **Working Voltage:** 12V - 14V
- **Rated Current:** 450mA
- **Luminous Flux:** 500Lm
- **Beam Angle:** 50°
- **Luminance Uniformity:** 84%

**TOOLTNS REQUIRED (not included)**

- Flared wrench
- Screwdriver
- Flathead
- Eye Protection
- Steps

**PREPARATION**

Check all components for damage, do not use the product if it is damaged.

**INSTALLATION STEPS**

1. **Step 1:** According to the spacing (see the "W" part of the picture) of two screw holes on the LED light base, drill two mounting holes and drive the expansion rubber plugs into them.

2. **Step 2:** Put the base onto the prepared mounting sites and then screw it on.

3. **Step 3:** Adjust the lamp directions as you like.

4. **Step 4:** Plug the light into the main socket.

5. **Step 5:** Place the three/two lights on the same horizontal surface for testing, and set the lamp angle on the light base according to the needs.

**INSTALLATION STEPS**

1. **Step 1:** Off electricity at the circuit breaker box or the main fuse box.

2. **Step 2:** The testing standard of the product is the accurate luminous flux.

3. **Step 3:** The testing standard of the product’s environmental conditions is a 55° environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

4. **Step 4:** This equipment complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

5. **Step 5:** This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

   1. **Increase the separation between the equipment and receiver.**
   2. **Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.**
   3. **Reorient or relocate the receiving antenna.**
   4. **Consult the dealer or an experienced technician for help.**

6. **Step 6:** This equipment includes exposure limits set forth for an uncontrolled environment. The equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
