

# Coffee Maker CLEANER

## FOR SINGLE AND MULTI-CUP MACHINES

Quickly removes lime and mineral build up from coffee makers and other appliances. Keeps your coffee maker clean for great tasting results.

## DIRECTIONS

For sensitive skin, please wear household rubber gloves. Rinse sink and other cleaned items after using product. Always follow appliance manufacturer's instructions and precautions.

**Automatic Drip Coffee Maker:** Remove any used or unused coffee from machine. Fill reservoir with water. Add 1 oz of cleaner for every 16oz. (2 cups) of water. Run solution through a complete cycle of the coffee maker. After brew cycle is complete, discard pot contents down sink drain. Rinse coffee maker thoroughly by cycling 2 reservoirs of fresh, clean water through machine. Repeat cleaning procedures monthly to maintain coffee maker in its top operating condition.

**Single Cup Coffee Maker:** Remove any used or unused coffee from machine. Fill reservoir with water. Add 1 oz of cleaner for every 16oz. (2 cups) of water. Place cup in coffee maker and run a brew cycle. After brew cycle is complete, discard cup contents down sink drain. Repeat until reservoir is empty. After cleaning is complete, rinse coffee maker thoroughly by cycling 2 reservoirs of fresh, clean tap water through machine. Wash reservoir before each cycle. Repeat cleaning procedures monthly to maintain coffee maker in its top operating condition.
