

Device structure

Operating instruction

Step1: Press the ON button of device. Put the device in planar surface and then press zero button for zero setting.

Step2: The positioning pin protrudes the bottom of measuring rod at the initial state.

Step3: Insert the ferrule into bottom of measuring rod and push the positioning pin up, then screw the fixed button to keep positioning pin still.

Step4: After finishing the steps above, we can start to measure the ferrule length. Insert the ferrule into bottom of measuring rod, then read the test value on screen.

Step5: Measuring finished and press the OFF button of device.
