

Composting with All Seasons Liquid Bokashi™

3 EASY STEPS

Add food scraps to the bucket in layers up to 3 inches.

Coat food scraps with 3-5 sprays of All Seasons Liquid Bokashi. 2-3 sprays may be adequate in humid climates or with non-absorbent food scraps like fruit and vegetables.

Close lid tightly after use and drain liquid every 2-3 days.

Once the bucket is full to capacity, the waste can be buried. Let the waste in the bucket sit for at least 14 days before burying. Refer to instructions on how to bury your food waste.
