SCD Probiotics® Announces Controlling Share in Probiotics Polska

SCD Probiotics®, a global leader in probiotic technologies designed to enhance human, animal, and environmental health, has acquired a controlling share in Probiotics Polska Sp. z o.o. Probiotics Polska Sp. z o.o. is SCD Probiotics' partner and is a top-performing company that has exemplified exceptional skill and passion for developing an environmentally friendly probiotic market in Poland and other European countries.

This partnership exhibits SCD Probiotics' strong commitment to investing in European growth of its technology. Both companies will seize this opportunity to leverage mutual strengths in an effort to achieve rapid development in the European market, which offers insatiable demand for environmentally friendly technologies such as those developed and licensed by SCD Probiotics.

SCD Probiotics' Founder & CEO Matthew Wood said, "We value our Polish partner's commitment, experience, and great achievements and are excited to announce a much closer partnership, bringing innovation and exceptional growth opportunities to all of us." Probiotics Polska Sp. z o.o. chairman Sławomir Gacka added, "We are proud to tell all our partners that today we laid down a cornerstone for sustainable growth for years and years to come."

About Probiotics Polska Sp. z o.o

Probiotics Polska Sp. z o.o. spearheaded probiotic sales in the highly challenging agricultural and hard-to-penetrate consumer goods markets. As such, it is known for offering farmers solutions that enable significantly higher yield to input ratio and developing and successfully marketing probiotic products that improve personal health.

About SCD Probiotics

SCD is renowned for its vibrant global network of licensees in more than 40 countries that markets unique, high-quality probiotic products that offer great efficacy.
