Stacking Kit Assembly Guide

1. Attach left side piece to the back.
2. Attach right side piece to the back.
3. Attach front piece to the left & right side pieces.
4. Attach the center brace to the front & back pieces.
5. Place the stacking kit on top of enclosure.
6. Open "Bag A". Place an "L" bracket in each corner of the stacking kit and secure them to the top of the enclosure (shorter screws) and the stacking kit (longer screws).
7. Place the next enclosure on top of the bottom enclosure and stacking kit.
8. Open "Bag B". Secure the top enclosure and stacking kit together with the provided brackets. (Flat "L" shape brackets) The longer screws go into the stacking kit and the shorter screws go into the top enclosure.
9. Open "Bag C". Secure the enclosures and stacking kit to the wall with provided "L" brackets using the shorter screws to connect the bracket to the enclosure and the longer screws when attaching to the wall.

Exercise caution and use common sense when stacking enclosures as they pose a tipping hazard.
