Solutions for Education

ENABLE A SMARTER LEARNING ENVIRONMENT

Verity Group™

Today, the pressure on educational institutions to deliver timely, relevant, & convenient information with fewer resources requires greater efficiency. Whether a major university or a small school district, paper-intensive processes play an important role in daily routines. Admissions, financial aid, human resources, individual education plans virtually any department or educational service deals with volumes of paperwork that are handled manually. Without a good document management solution in place, you feel the pain in wasted time and money, decreased teacher productivity, delayed decision making and increased security risks. Digitizing and streamlining workflows can help to reduce costs, meet compliance requirements and better serve students, faculty and administrative staff.

HP CAPTURE AND ROUTE

HP Capture and Route solution helps convert paper-based information into digital files that are easier to access and share. The simple, one-time, digital capture of a document—such as a student admission form—makes it immediately retrievable, and easy to distribute and track. By streamlining the flow of documents, HP Capture and Route enables employees to do more with information—increasing productivity and collaboration. This helps to accelerate decision making processes by integrating content into departmental workflows, such as admissions, registration and financial aid. Improve staff productivity and reduce data processing errors by automatically updating captured metadata.

HP SECURITY MANAGER

HP Security Manager helps to control your imaging and printing environment—from document and data security, to record-keeping, archiving, and document retrieval—with greater ease and efficiency. You can easily secure student and teacher documents from inappropriate access and misuse. From confidential student information to school operating budgets, your content requires constant protection to support regulatory compliance. Unsecured print devices and data can put the entire institution at risk. HP Security Solutions for imaging and printing help eliminate potential vulnerabilities throughout your organization. The built-in security features of HP devices help you develop and deploy an end-to-end imaging and printing security strategy.

We offer streamlined information-management capabilities, as well as tools to asses, manage and fortify security for imaging and printing fleets, mobile printing and cloud access.
